

THE GALLERY CAFE INSIDE

SOCIAL AMBIENCE

The ArtBridge as its name suggests, is a bond for the community to gather around art events. As expressed by St. Kilda's community, art is a key for Melbourne's playground, so the bridge brings the opportunity for pedestrians and cyclists to travel from one point to another of the site through an artistic experience. They can either walk by for transfer needs or be part of what's happening at the triangle, visiting art events, local pop-up markets, concerts, attending a meeting or gathering with friends and family at the cafe with spectacular views of Port Phillip Bay. This way we are motivating for walking rather than car use.

At the end of the right art space mountain there is a pipe like hole that provides sights to the underground park space. This way we increase green spaces for gathering and playing and send the parking spots to belowground.
