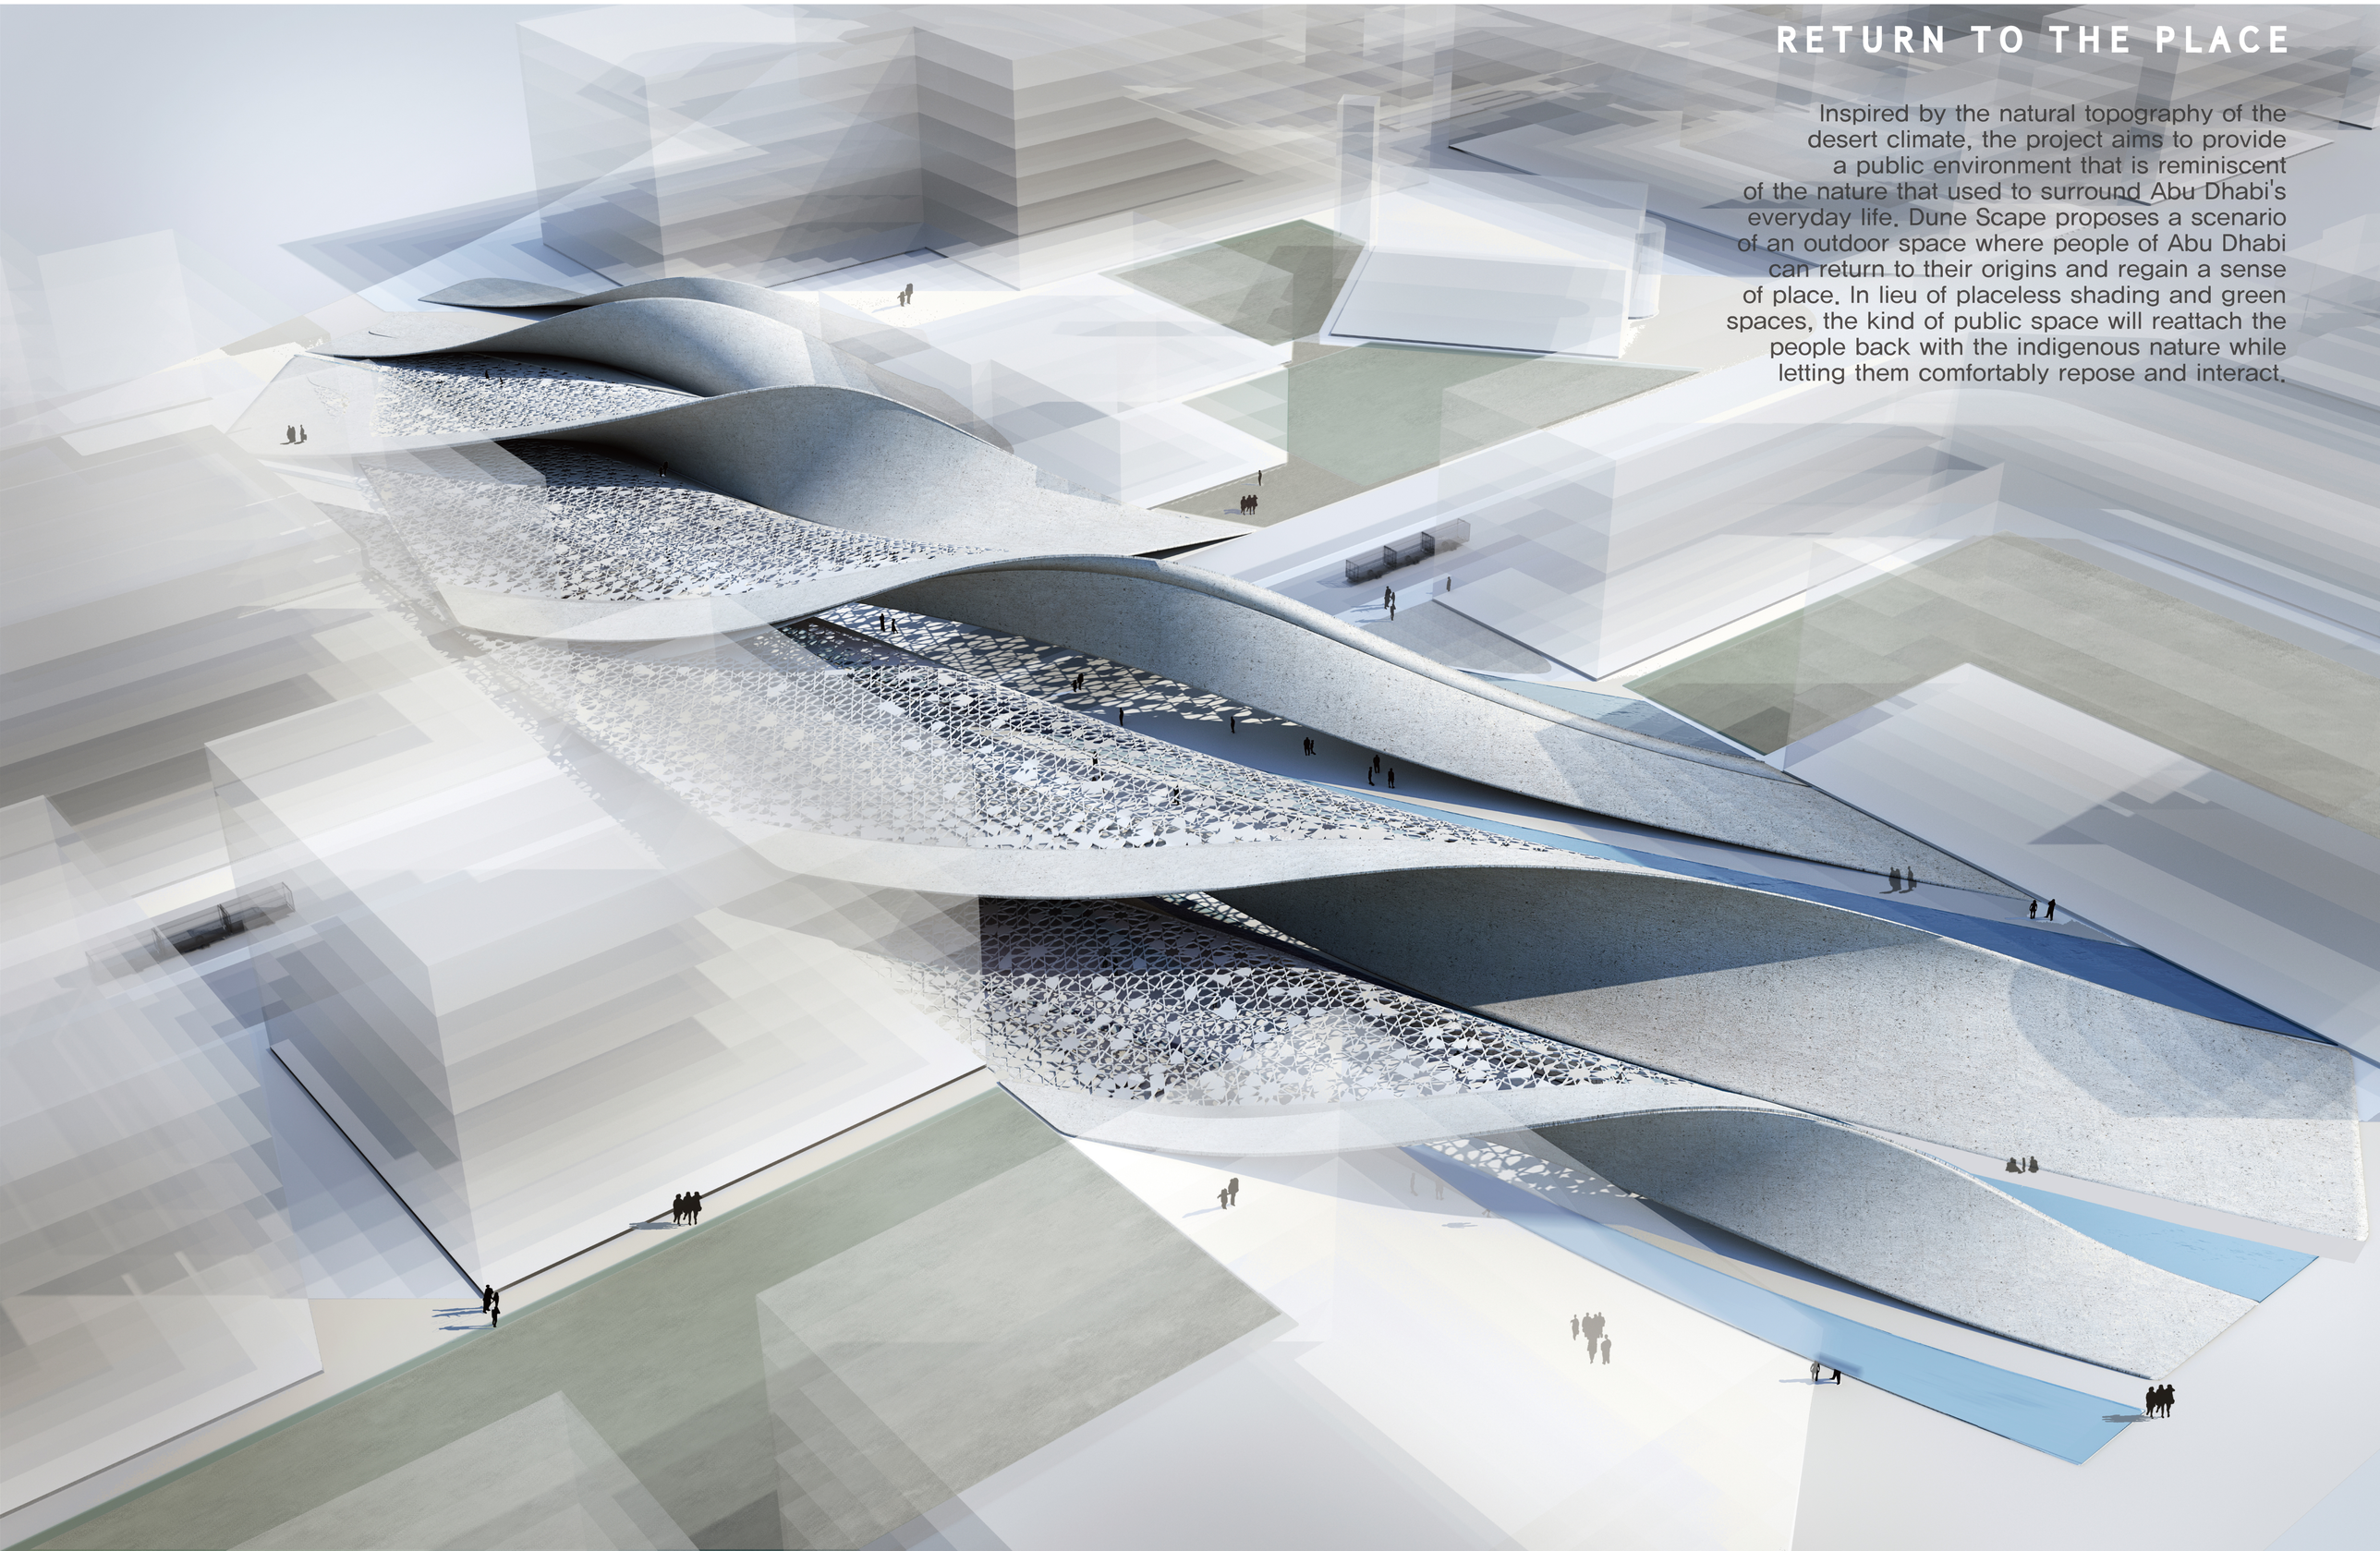
DUNESCAPE

RETURN TO THE PLACE


Inspired by the natural topography of the desert climate, the project aims to provide a public environment that is reminiscent of the nature that used to surround Abu Dhabi's everyday life. Dune Scape proposes a scenario of an outdoor space where people of Abu Dhabi can return to their origins and regain a sense of place. In lieu of placeless shading and green spaces, the kind of public space will reattach the people back with the indigenous nature while letting them comfortably repose and interact.
