

THE TRIANGLE ART BRIDGE

THE CONCEPT

CONNECTION: *The act or state of connecting. The state of being connected. Anything that connects; a connecting part; link; bond.*

The need for connecting areas around St. Kilda triangle; art and everydayness; pedestrians and cyclists; landscape and renewable energy public spaces, is what brings us to the concept: a beautiful connecting structure that fulfills these needs and preserve St. Kilda's social essence.

The Triangle ArtBridge in Melbourne's playground consists of an x formed renewable energy generator bridge that connects The Palais Theatre with St. Kilda beach and the Slopes and Lower Esplanade with the South Beach Reserve across Jacka Boulevard, while creating interesting public art spaces, and horizon viewpoints of all the area.
