

1. Array Collecting Average of 4 hrs direct light.
2. Tilted Array Allowing Runoff collection
3. Heat ventilation through tilted paneling

Solar Panel Size of 1.65 meters x 0.99 meters

1.64 Sqm per panel

Total Surface Area: 3120 sqm.

This total surface area provided by the canopy can then be divided through by that of the solar panel

1,900 panels = 1,900 kWh day

250 watt-hrs per panel collecting 4 hrs a day

665,000 kWh annually
