

New laneway infrastructure and a home for the local market.  
Distinctive lighting for the feather shafts.

Rammed earth cabins below, sized to incubate small laneway businesses and temporary vendors.

Feathers can be configured in section to create bridges across major boulevards and an accessible path to shore.

Long slender arcs in plan - shade and shelter, with solar panels on top, connecting the vibrant town with the shore.  
Steel structure with 196 x 99 panels in herringbone feather pattern.
