

# VISUAL ENERGY

concert goers  
keep track of their  
energy production  
with the **interactive**  
energy meter

photovoltaic thin film  
technology along the length  
of the Acoustic Shell collects  
solar energy & is directly **stored**  
within the structure,  
producing energy to replenish  
what is being used on-site

kinetic pavers beneath  
the surface produce  
**additional energy**  
during concerts  
& events

## NET ZERO

## THE ACOUSTIC SHELL VISUALIZING ENERGY & STORAGE
