

4 Meter Curved Turbine Blade covered in a green pigment to represent the leaves on a tree

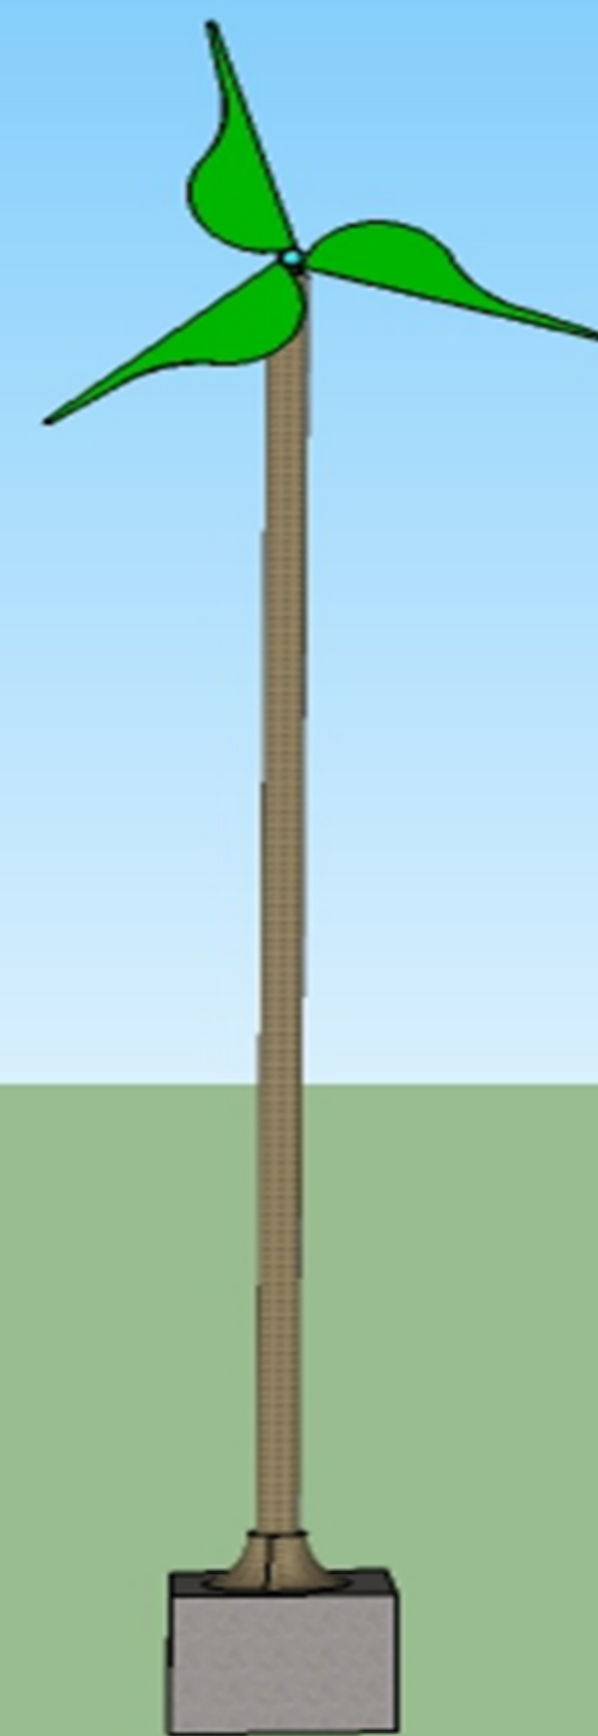

Tower Foundation
1.5 x 1.5 x 1.2

Turbine nose and tail covered with a blue pigment to represent a bird or flying creature.

The tail also allows the turbine to spin 360 deg this is useful should the wind direction change the turbine will rotate and adjust to the change making it more efficient

The Monopole tower is 12 meters high with a base width of 30 cm. this slender Tower is covered with a fiberglass layer that is designed to look like the bark of a palm tree.
