EVENT SPACE

RELAXATION

Activities

The installation encourages to walk around the park and discover the Dandelion journey. Along the walking, visitors can find **hammocks** and **swinging-seats** to relax and contemplate the flowers every hour of the day. These type of elements give the sensation of swinging in the wind with the Achenes. Around the installation the park leave space for setting up the facilities for events.

Interaction

During the night the visitors can interact with each Dandelion. A blow-activated switch is installed on the base. The visitor can **blow inside it**, making the flower "volatilized" in the wind. Part of the Dandelion lights will switch off and the flying Achenes will turn on. In this way everybody can easily understand the power of nature source. The LED lights are powered by the inner storage presents in each element.
