

BALANCE

The dome will be lit using LED up lighting colour floods from underneath and inside the dome. Highlighting the architectural form, the tree and the 4 elements. Each of these elements will be represented by a different colour and lit to accentuate the flow of the vortex as it forms the dome.

Each arm will have built in lighting. Every rib section will have a LED strip set into the inside edges. Each will have a unique colour to represent the element specific to that arm. FIRE, EARTH, WATER and AIR.
