

5 bridge sculptures represent the connection of five continents.

100 wing sculptures represent the countries participating in The 24th World Energy Congress.

This project not only provides people with a place to play and relax, A total of 1480 square meters of solar panels can generate 600 MWh of electricity per year.

The main body of the sculpture is steel and concrete, which is easy to build locally.

This project create a vibrant landscape for the city, attracting local residents and visitors from all over the world. Its interactive features encourage people with different cultures backgrounds come here to meditate, listen and talk together.
