

Entertainment

Led visual lights to provide enertainment to people while enjoying and relaxing

Energy source

Seating area is provided to with each individual charging stations so people can benefit from the structure's energy may it for leisure, entertainment or business.

Vegetation

Due to the extreme heat of UAE desert. It is highly considered to put as much shade from the sun, which then minimize solar gain in the area. We propose planting vegetations and trees in the area with specific height restrictions in consideration to our designed structure.
