tethered pixsols* enveloped with woven solar fabric
going up and down with the rise and fall of the sun
fusing as a kinetic canvas for new media and generative art
forming a digital interactive cloud for shadow and light
promoting a place for events, festivals and life

solar CLoud

an event place to gather, harvesting solar energy for (fun)ding, ephemeral kinetic sculptures in harmony with natural flow of life,
taking a real-time form of the sun everyday, reconnecting human with elemental planetary sources of energy.

the topography is defined with probable human shortcuts, encouraging encounters, stimulating a vibrant urban realm for a united community.
