

HELIO-SURF-FOREST

ABU DHABI

(where the only emissions are clean peeling surf)

Surfers have been tapping into natural energy for generations. Ancient Polynesian cultures even considered the activity of surfing to be on a spiritual level. HELIO-SURF-FOREST adds another dimension; connecting people to waves driven directly from the sun's rays. Here, surfers and onlookers alike can be immersed in the physical transformation of solar energy into electricity and perfect, rideable waves.
