

GRT RAIL

## Introducing **Ecotone**

Ecotone heralds the future of public art in which the new mega art trend meets activation and animation to create a place that is at once art, landscape, museum and park. Ecotone offers a wealth of experiences and will be a new heart for Masdar.

The undulating surface, evoking waves and dunes, invites families and friends to stroll and explore; to settle for an evening picnic and marvel at the solar concentrator dishes tipping towards the heavens or to enjoy the timeless rotation of the stars. An exhilarating rush through the Fossil Tunnel on the GRT delivers commuters art on the move, with a glimpse of the prehistoric animals that once roamed the land. Photovoltaic dome shelters provide shade, areas for rest and observation, and additional energy generation.
