

# INSPIRATION

*"As an architect, I designed for the present, with the perception of the past, for an essentially unknown future."* **Sir Norman Foster**

So the idea of the project was inspired by the heritage of this place. Where Bedouin tribes were known to live in tents. Grazing camels, producing dates and vegetables in oases, fishing and diving looking for pearls on Abu Dhabi coast

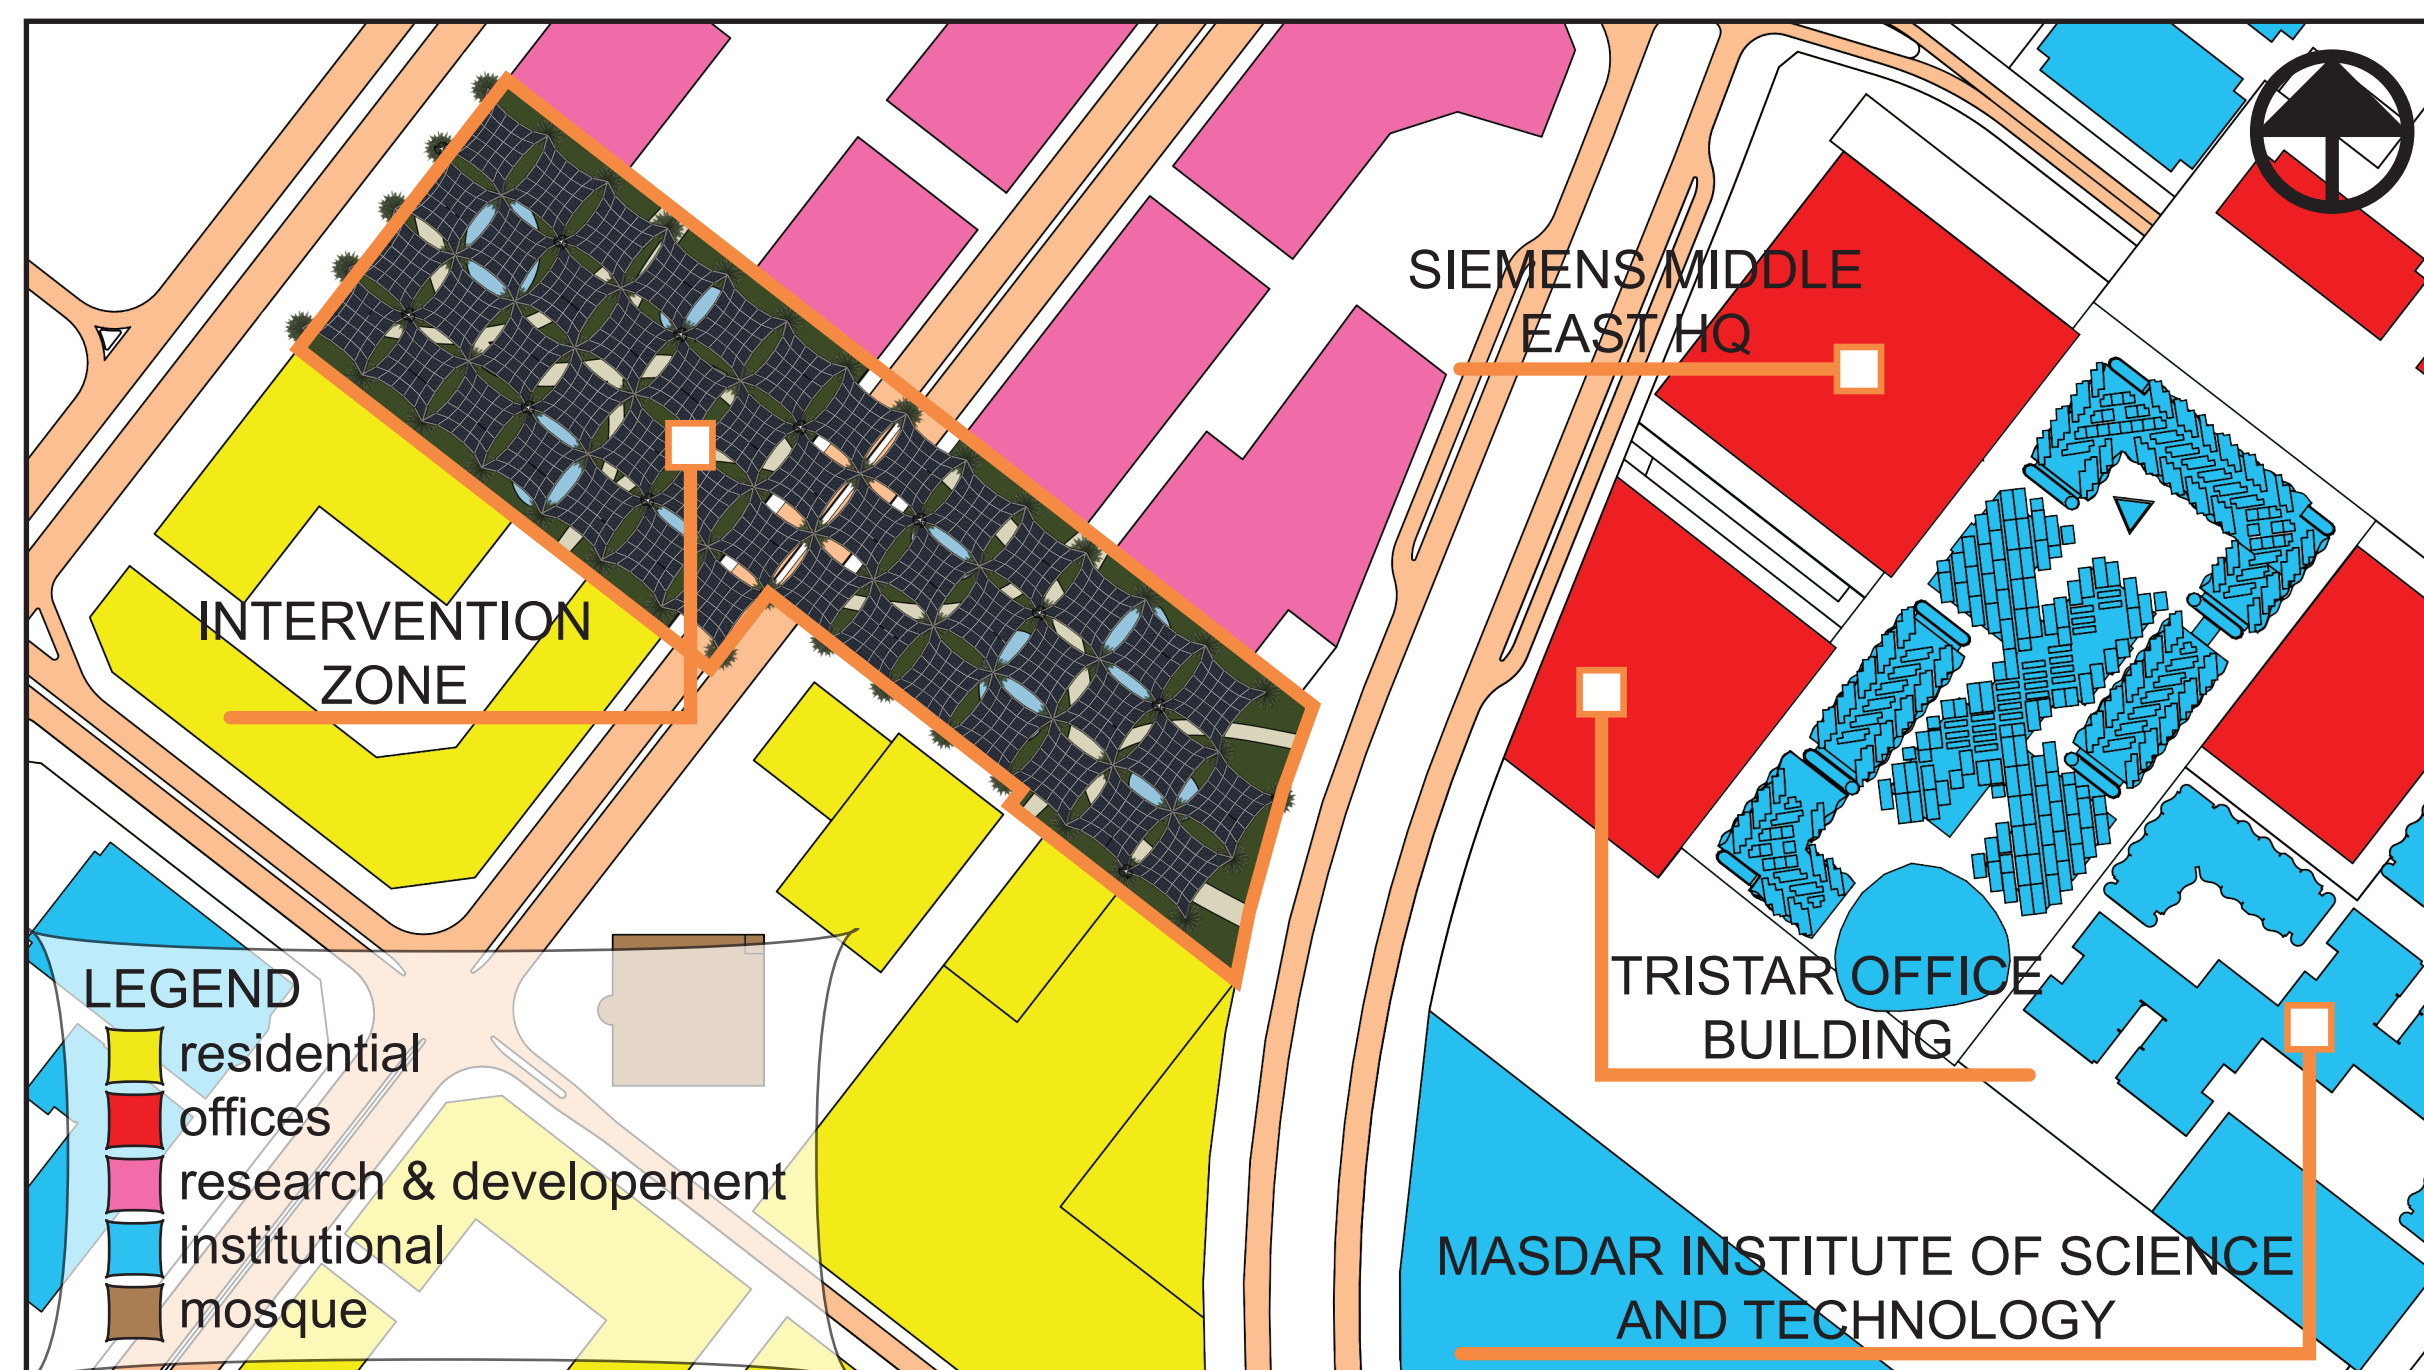

The term **Bedu** are used for deserters whose livelihoods depend on raising livestock and living a mobile life in search of food and water. Bedouin life is an Arab cultural tradition specifically
