

Each cone to produce about 100 liters of water a day.

SITE PROJECT: FOLLOW THE GREEN BELT

ROAD, BETWEEN THE SITE

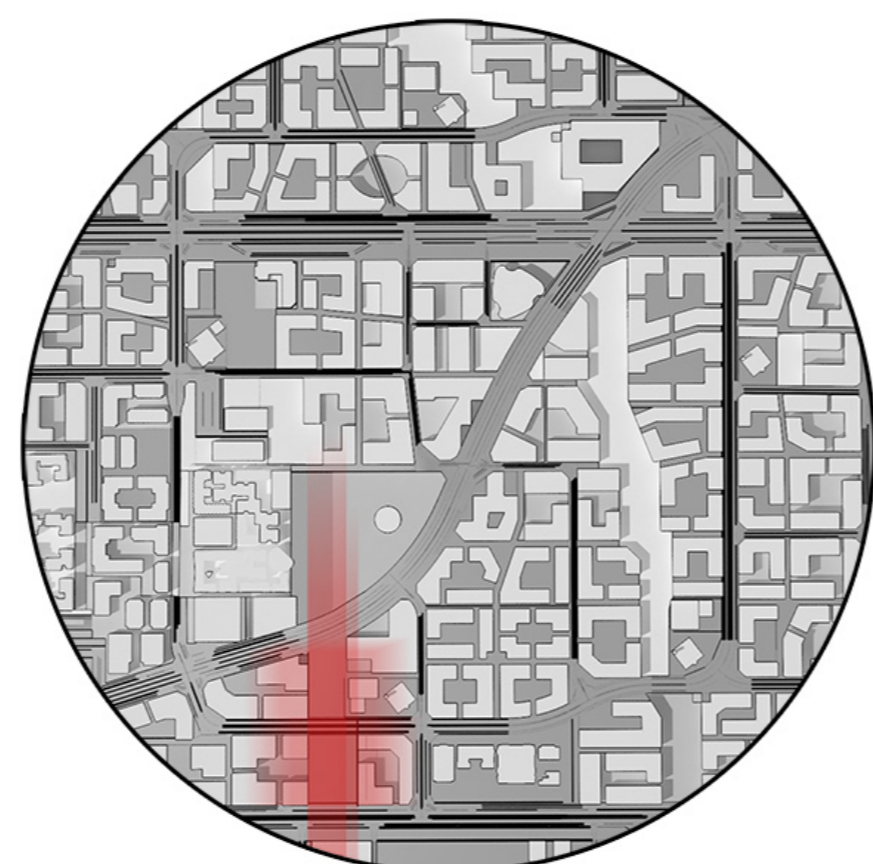

Preservation of urban green space. The presence of green space will make the city beautiful and refreshing. The city is alive and continues along the machine environment.

The temperature in 24 hours, in masdar city. This air temperature is due to sunlight. So the use of solar panels is appropriate.

The four water resources, along with the shadow, provide comfort to the people.

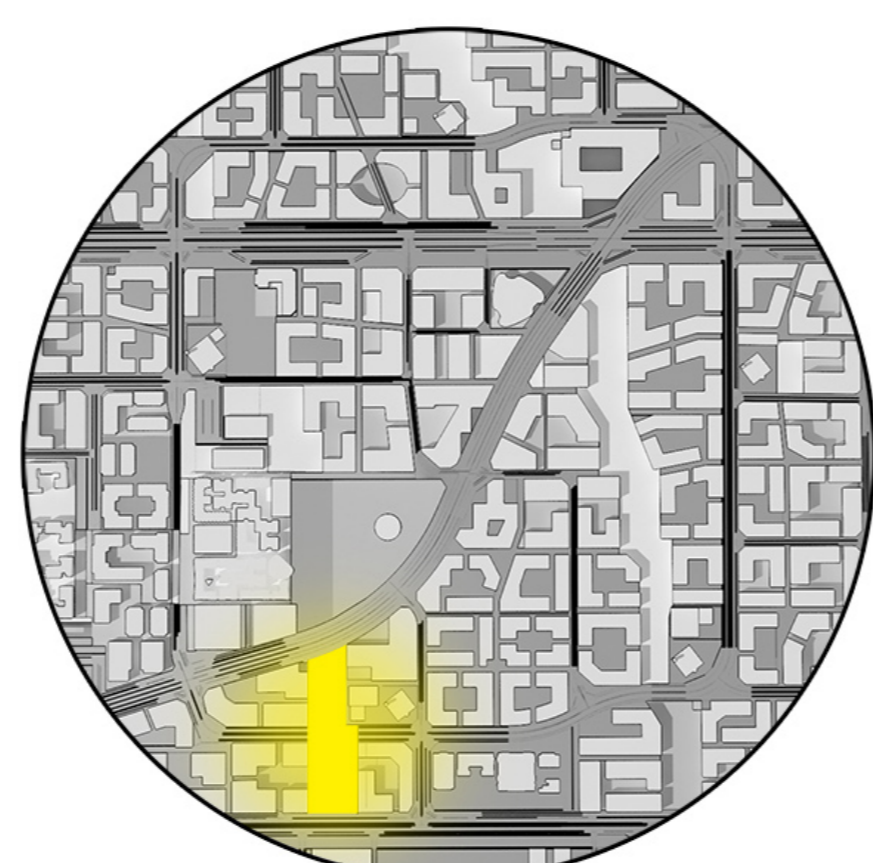

MONUMENT IN CITY

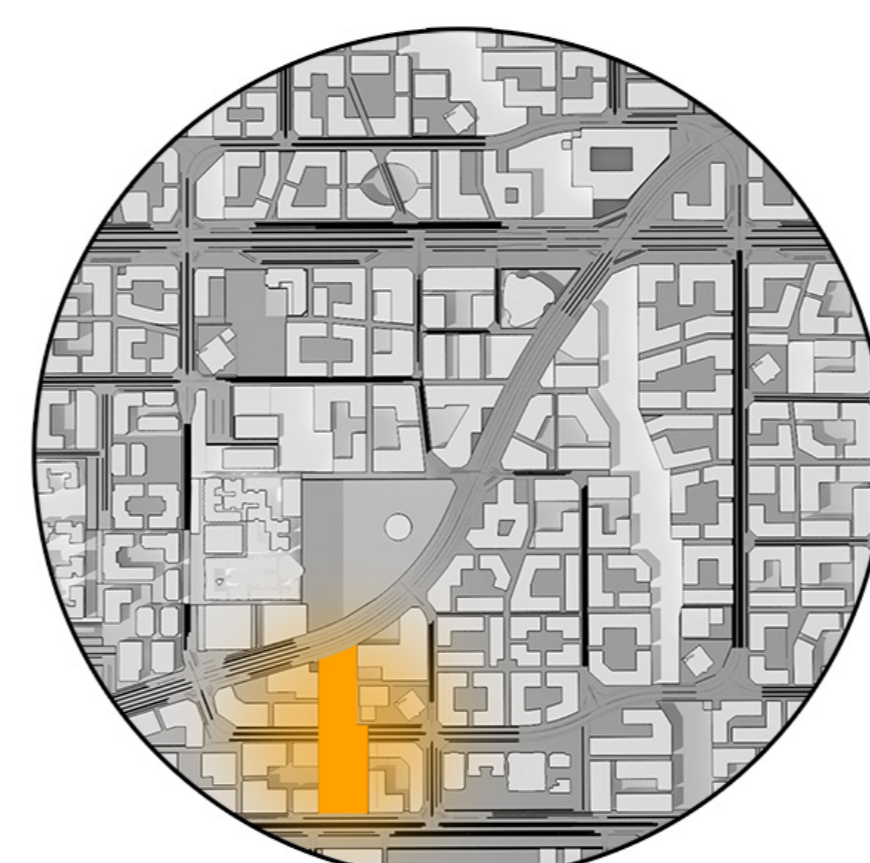

URBAN WATER SUPPLY

The existence of a metropolitan area causes interaction and communication between people. Now, it produces a city sign. Save and generate energy using the existing environment. This production can provide electricity and water to the city. This Plaza is a memorable place among the people.

URBAN ELECTRICITY SUPPLY

URBAN PLAZA
