

The Vortex Concept

Waha "Oasis"

Its where all living being in the desert area returns to refresh and energize.

The Vortex will be the magnet for Visitors to experience comfort on the area at the same time be aware that the elements that they visited can be an icon at the same time be sustainable.

Ghaf Tree

With it very limited resources it still finds its way to grow and be the main source of needs to the people. Not just a nice shade on a hot desert, its leaves to is a fodder, also used in salads which is rich in protein, and its flower honey is of high quality.

It links to the structure as it is a self sustaining element which will give comfort to the visitors through a well planned airflow

Egal

a headband worn by Bedouin Arab men to keep the keffiyeh in place.

The structure will be build to retain the people around it and creates bond and camaraderie.
