

The Vortex

Kinetic Shakers

A kinetic wave energy harvester the more wind will blow on in the more it shakes and convert it to an energy which will lit its globe head at night time.

Kids and adult will be tempted to shake it as well as its wobbly, with out them knowing they are contributing to its energy storage.

Vortex Ghaf

A wind energy harvesting tube, wind gose through the pipes release it inside and rotates the 3 turbine hidden in the middle of the vortex. Excess wind will be transmitted below its base and transfer it to the baystander, making it as a cooling system in to its surrounding. Its wierd look from a far would drag up people's curiosity leading to social media publicity educating people how its weird look could harness electricty.

Phone Buster Seat

Its surface is a solar panel and a wireless phone charge, making people to try it makes them away from their phone leading to more social interaction cutting the stigma of people being on their phone.

solar cell are dome type which does not need proper direction of the sun just to harvest energy.
