

# LAGI 2019 - Abu Dhabi

## Land Art Generator

Renewable energy can be beautiful

The proposed design site for LAGI 2019 is the area shown in yellow below which measures approximately 25,000 square meters in area (300.m x 90 m).

### LAGI 2019

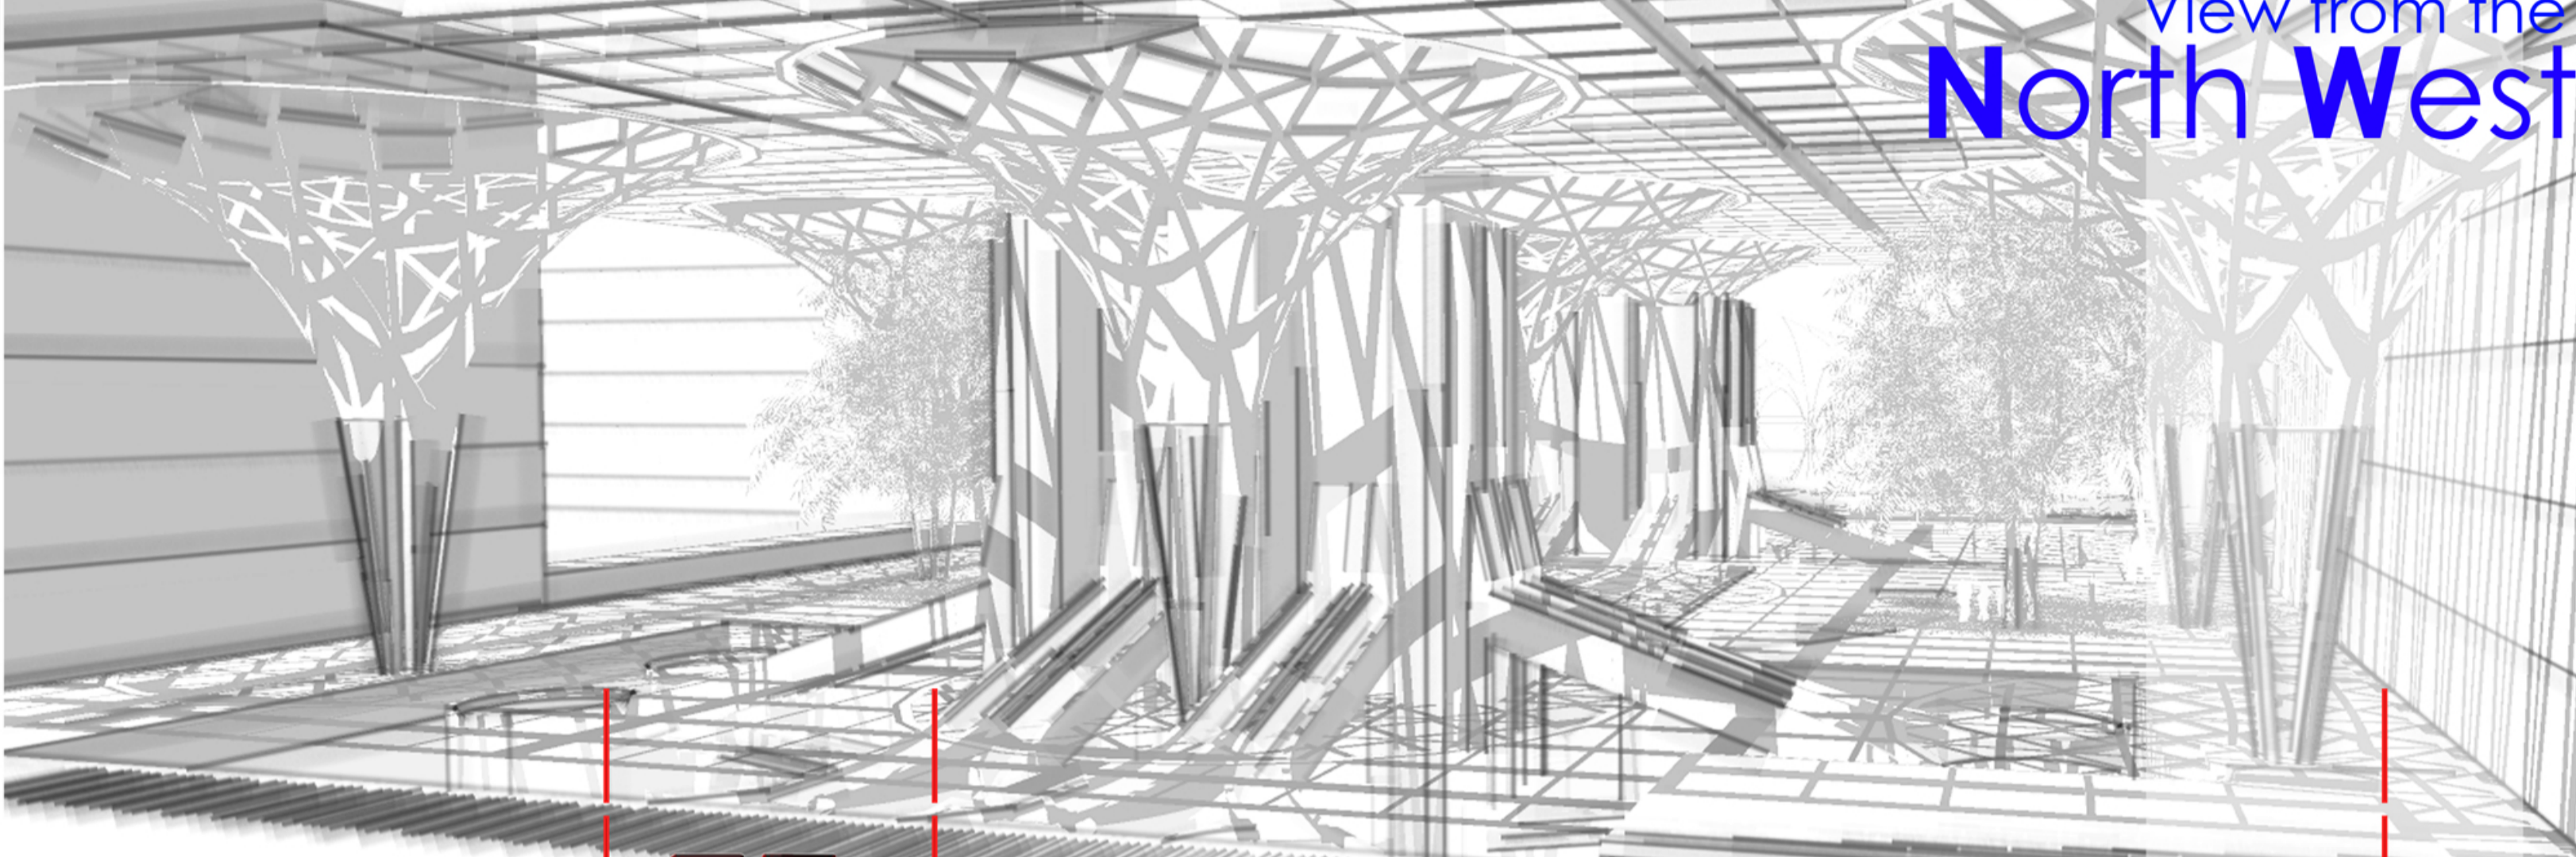

#### Return to the Source

A vision for the public art within the public space of Masdar City the global capital of sustainability

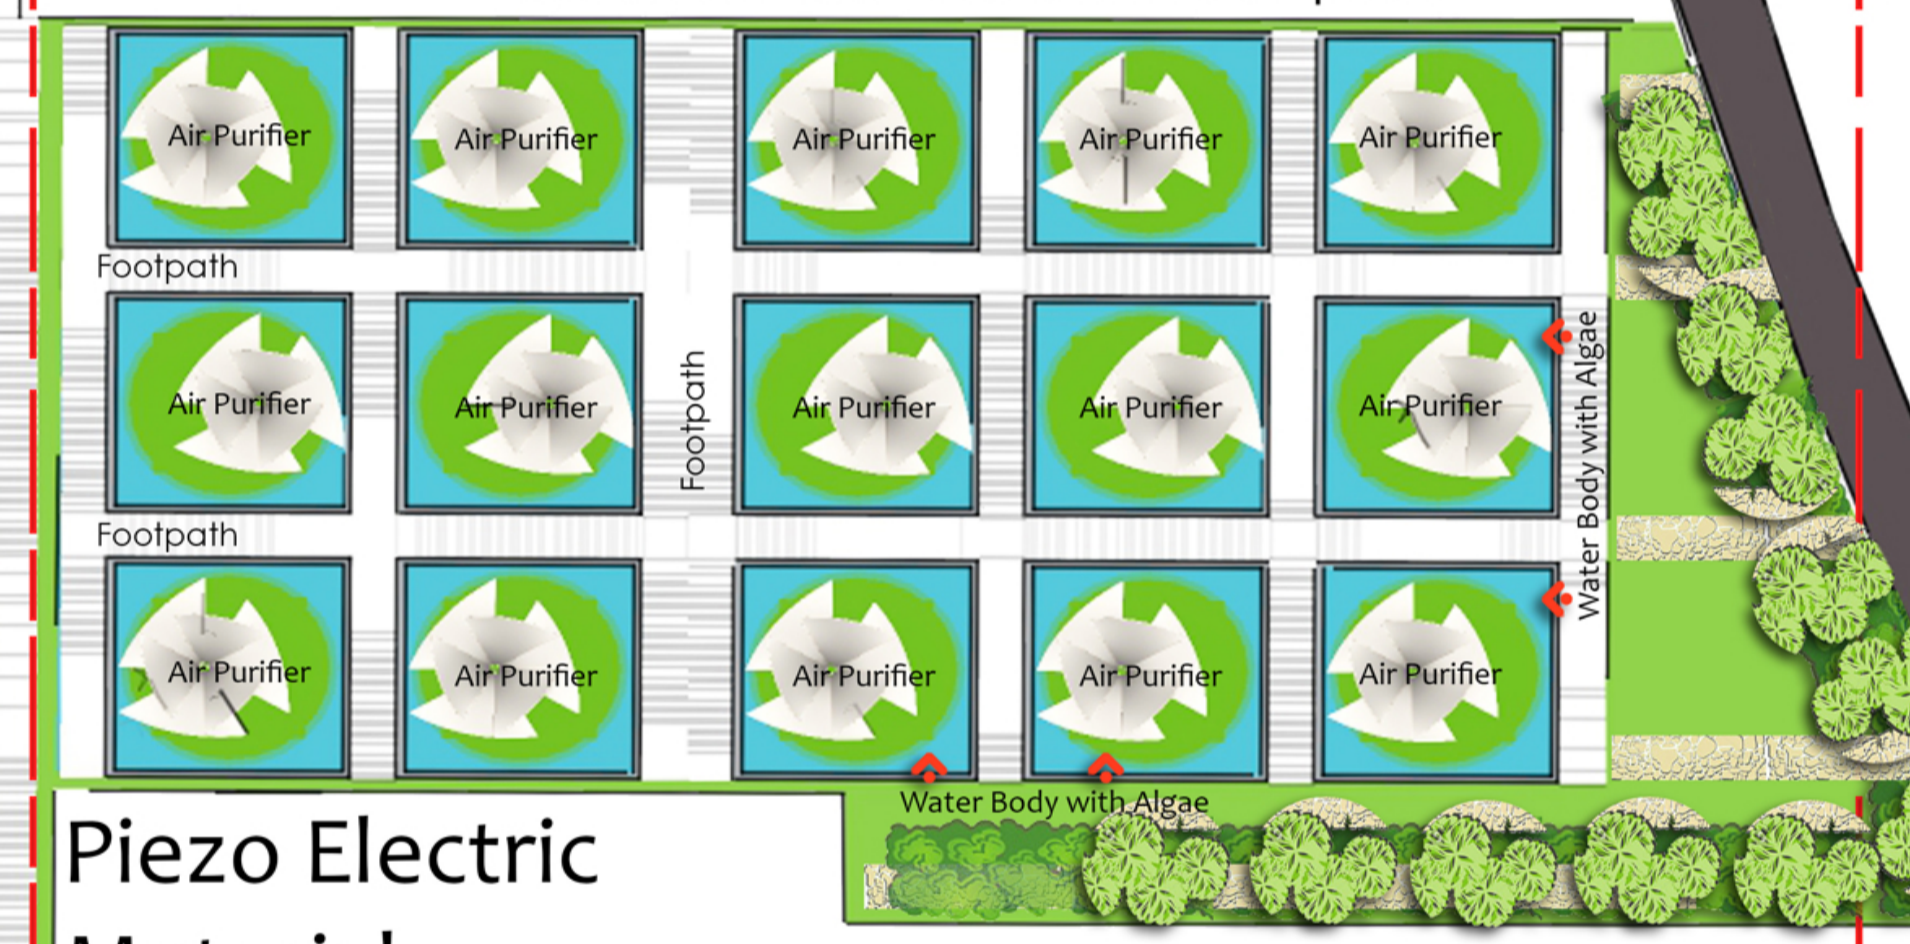

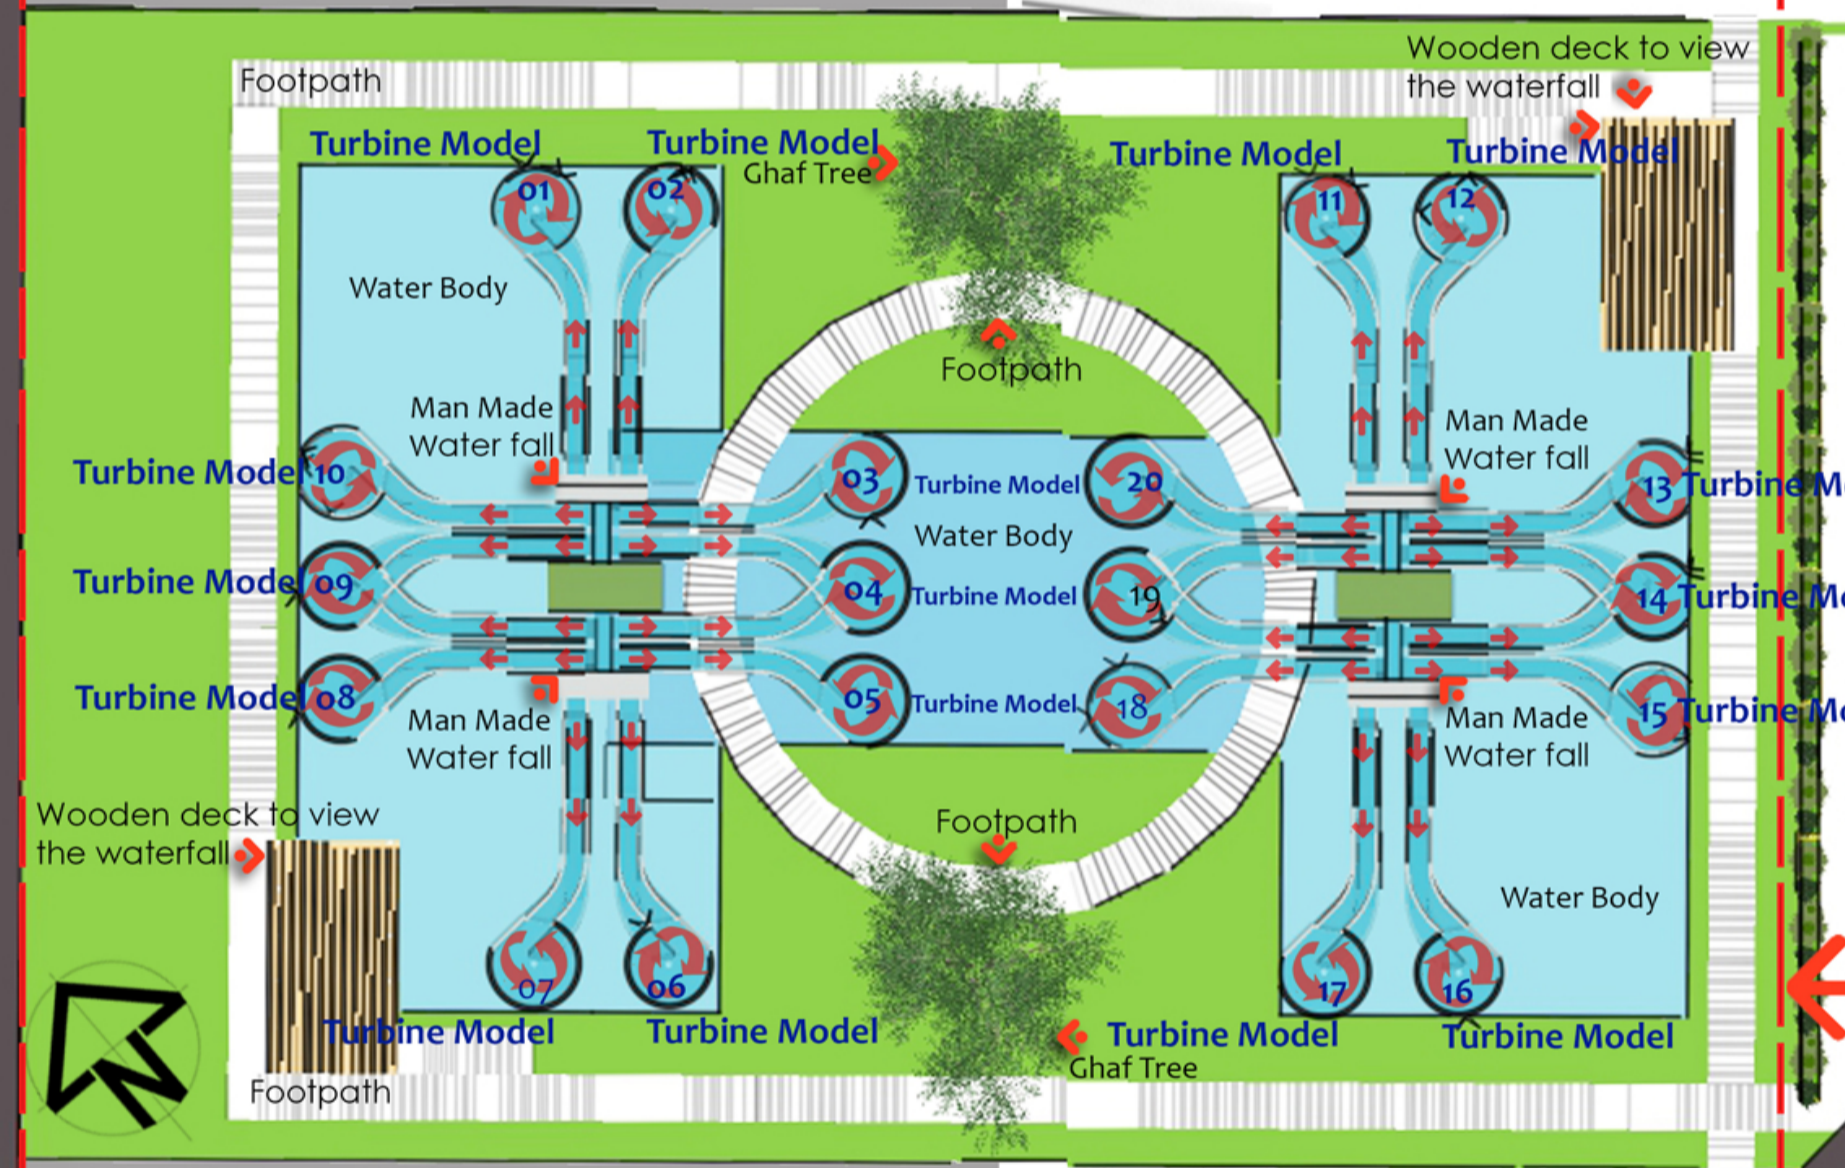

**Part 01** Will be to produce clean electrical energy by using the micro hyro power

**Micro Hydro Power**  
View from the North West

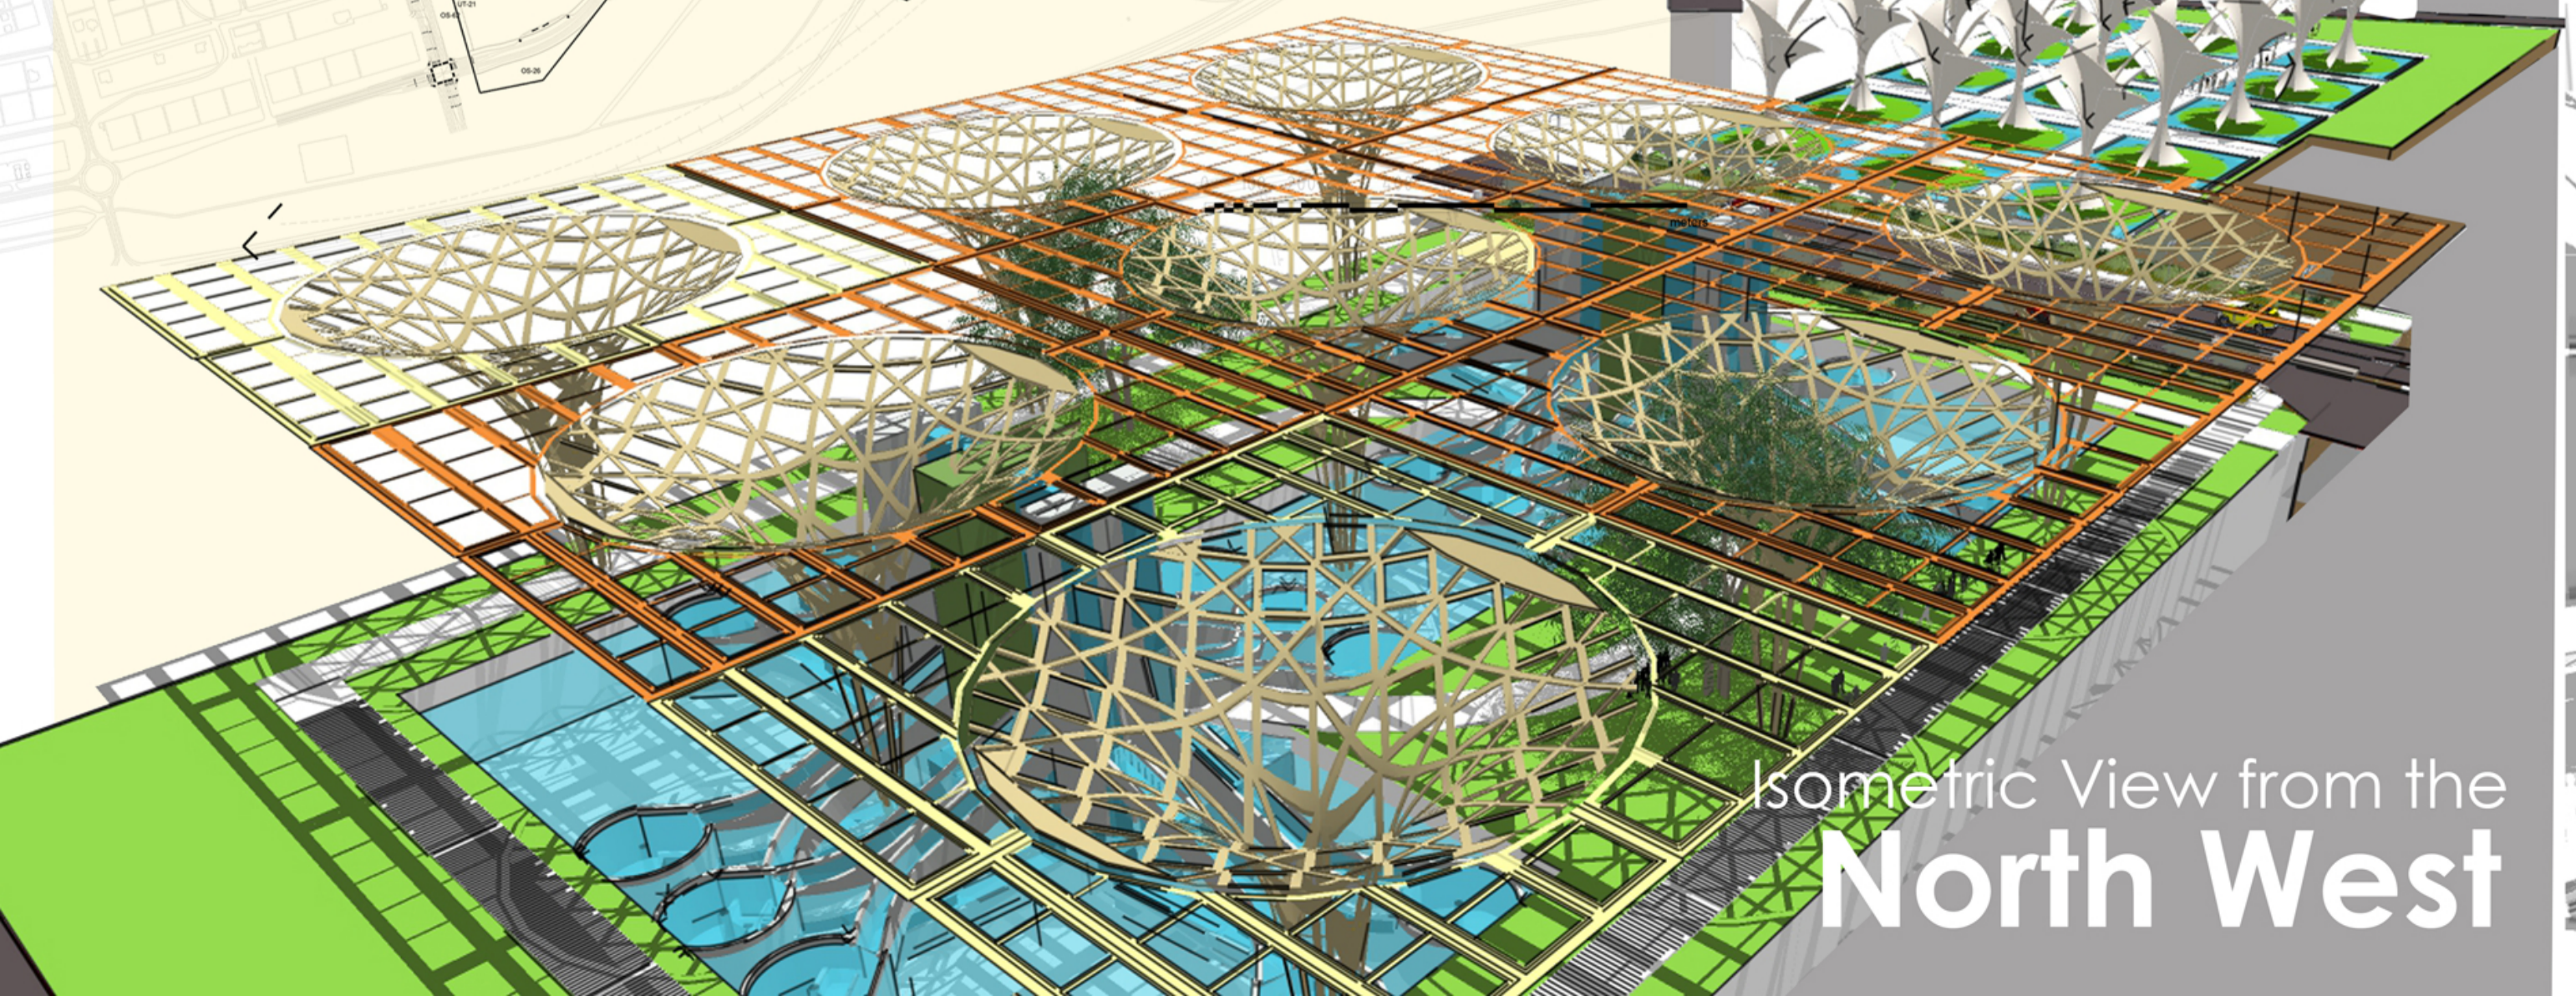

**Part 01 - Micro Hydro Power**  
Generate Electricity

**Part 02 Air Purifier**  
Reduce the Carbon foot print

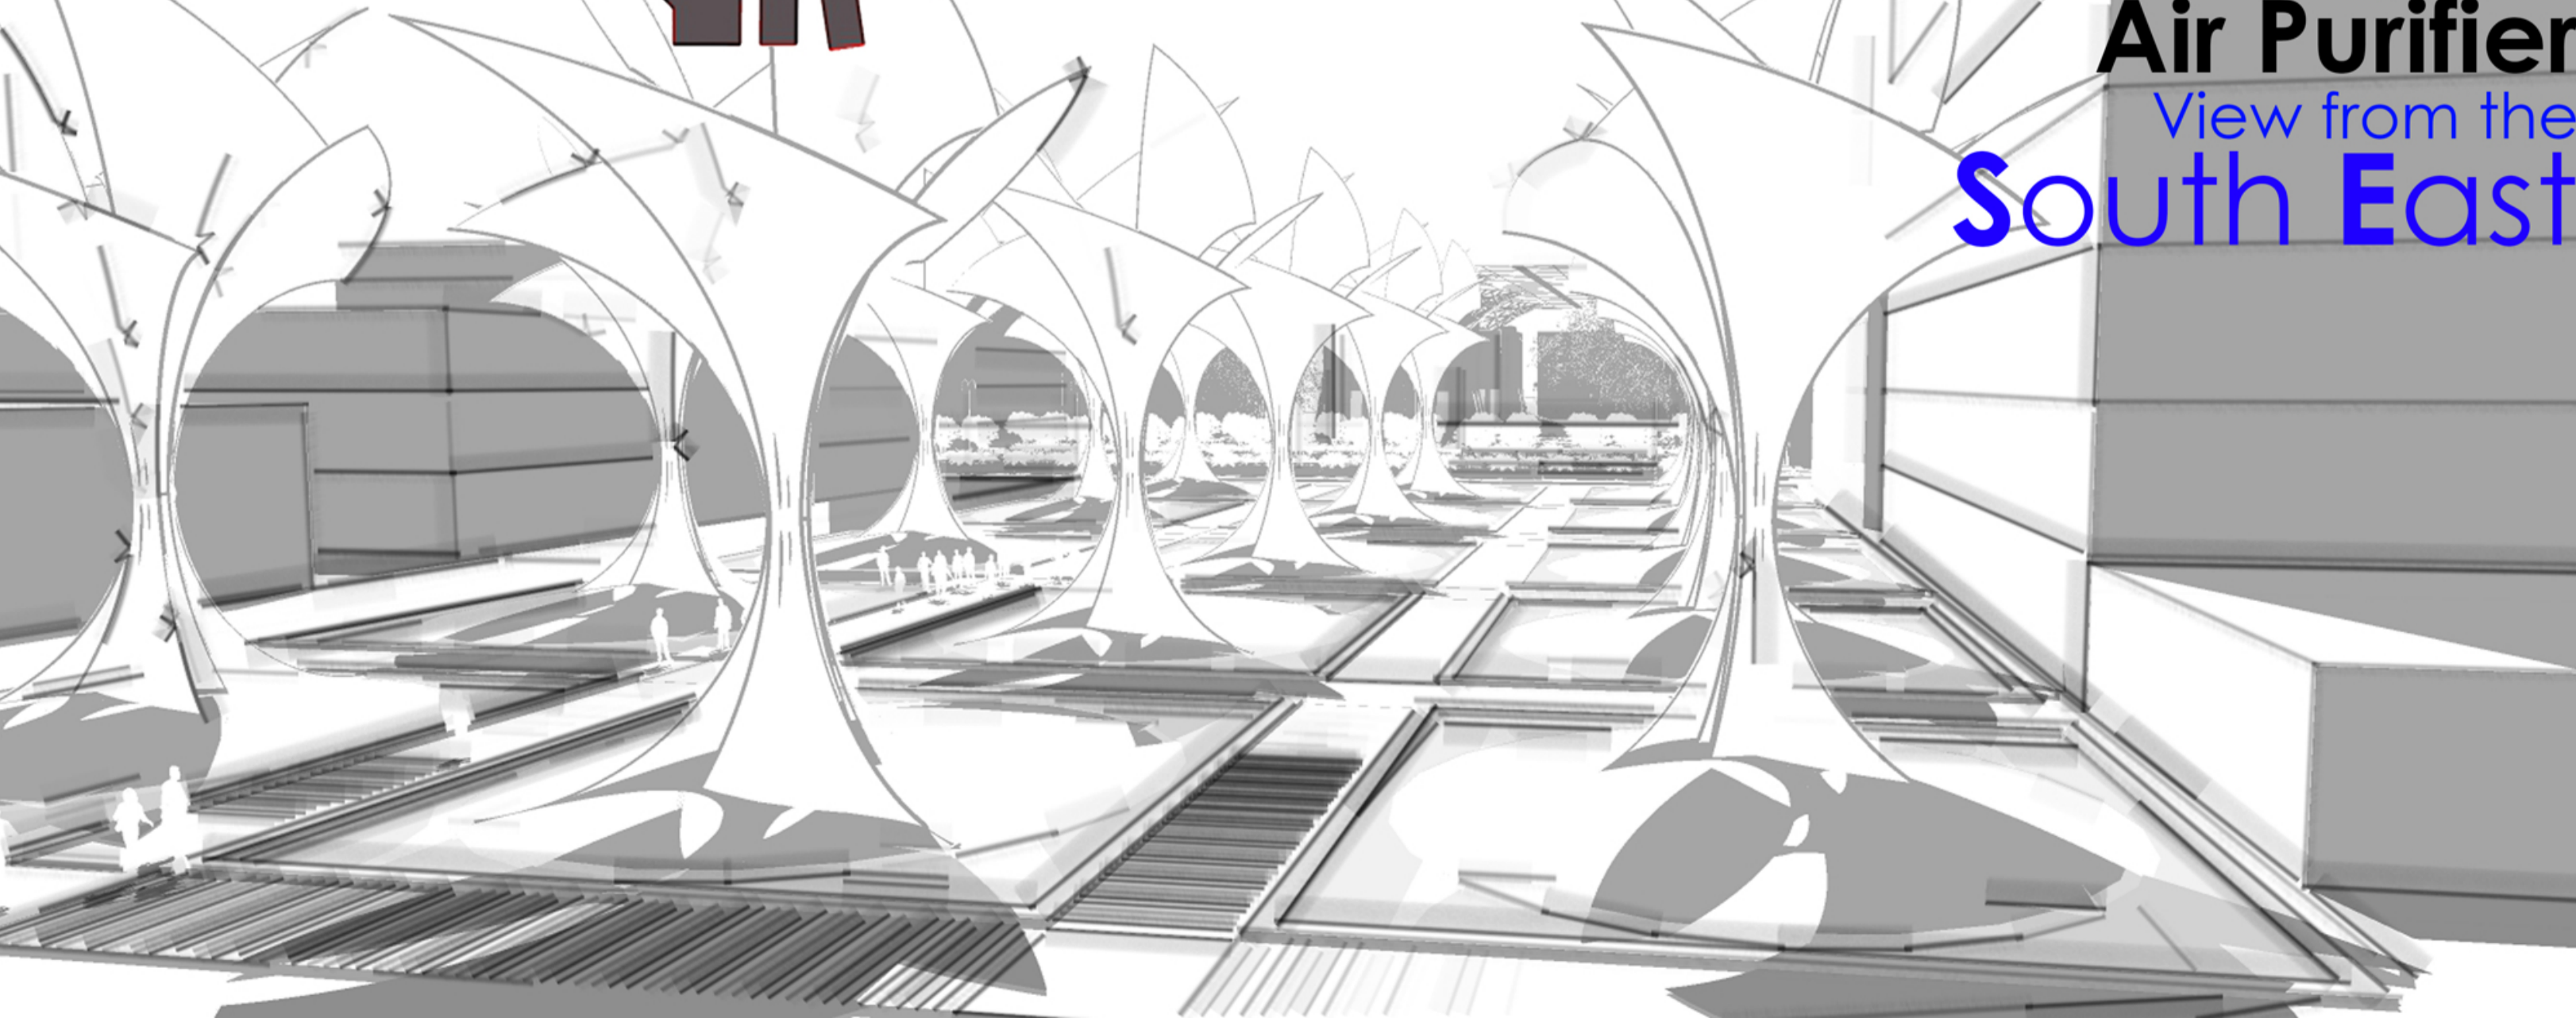

**Piezo Electric Material**  
The cars movement and pressure on the road will generate electricity. Since the site is split in in two by a road, in my concept the two parts have different use

**Part 02** Will be to purify the air and reduce the carbon footprint
