

2. the Kaleidoscope of Marou: Integrated Design

The Kaleidoscope Module has all required functions integrated on the **same footprint**:

- 1: Solar Panels for Energy Harvest
- 2: Inverted Umbrella for Rain Harvest
- 3: Vertical Movement for Hurricanes
- 4: Water Storage
- 5: Ballast Function-keeping it all down
- 6: Skirt Storage
- 7: Impact Protection Barrier
- 8: Load bearing part of the Kaleidoscope

Fijian native art on display in the Atrium. Also note the light blue water hoses coming down.
