

IDEAL MODEL

The functional model of the station includes cultural, educational and recreational functions.

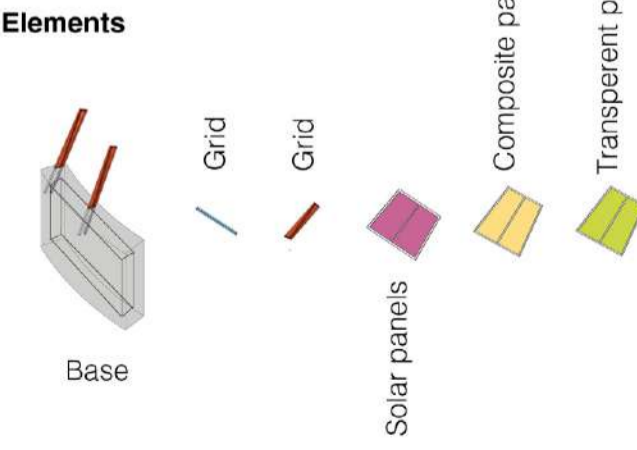

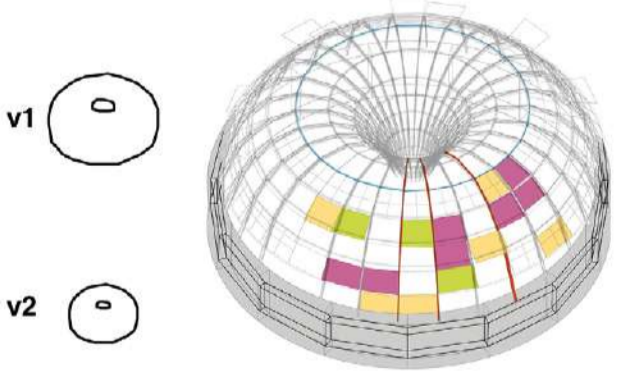

The station is a stable shelter like a tree that unites the space under the canopy of leaves.

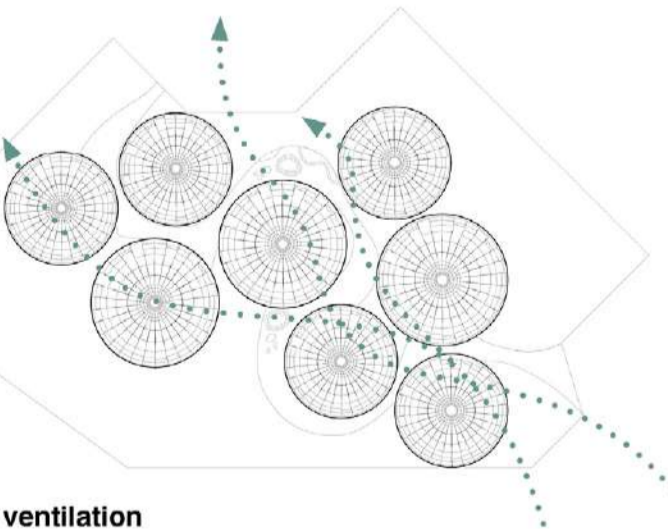

Recreation Education landscape Culture function

STRUCTURE

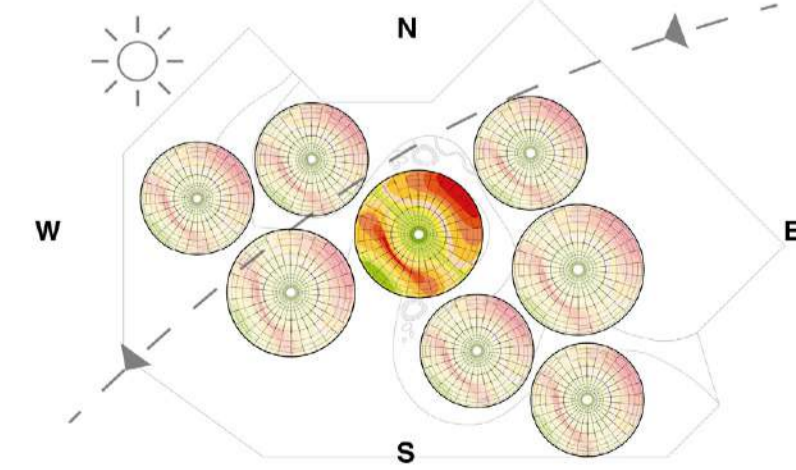

The station structure is assembled at the construction site from ready-made elements as a construction kit. Each of the modules has a low weight, the material of the spatial frame is aluminum.

CLIMAT CONTROL

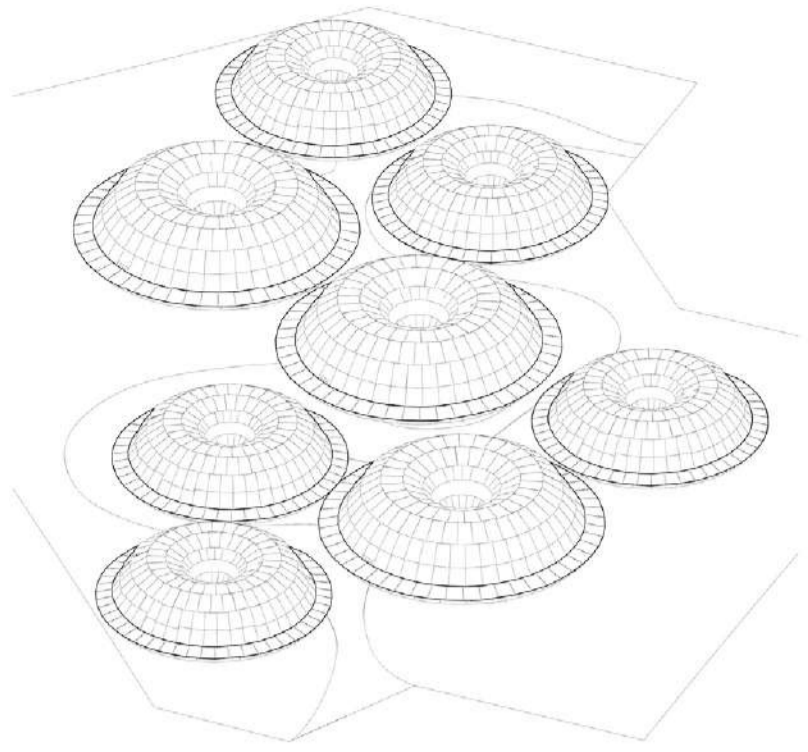

Natural ventilation

Overheating zones of the construction

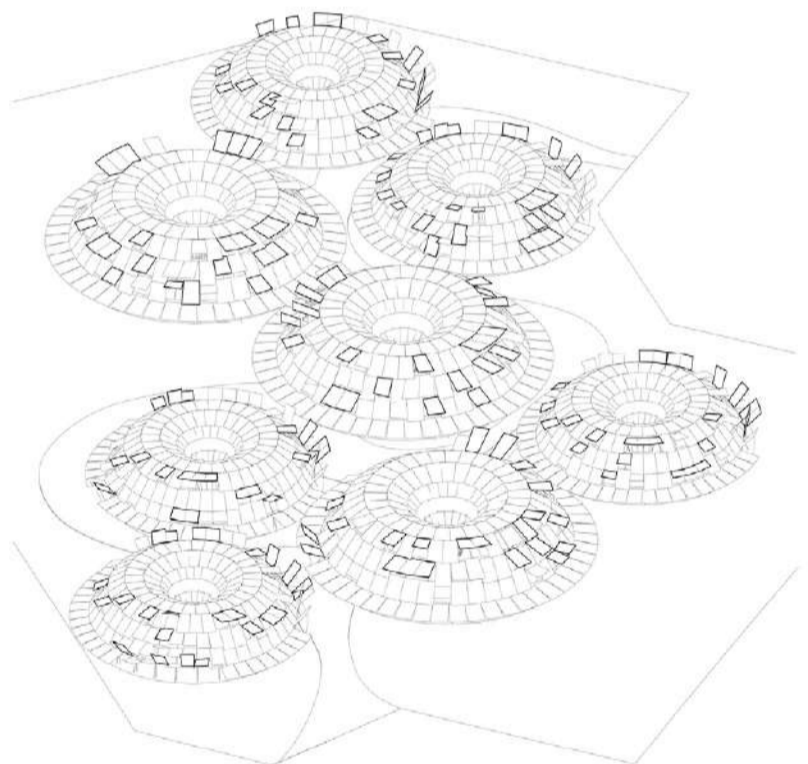

Everyday life

In everyday life, the contour of a stable shelter can be either open or closed, depending on the function.

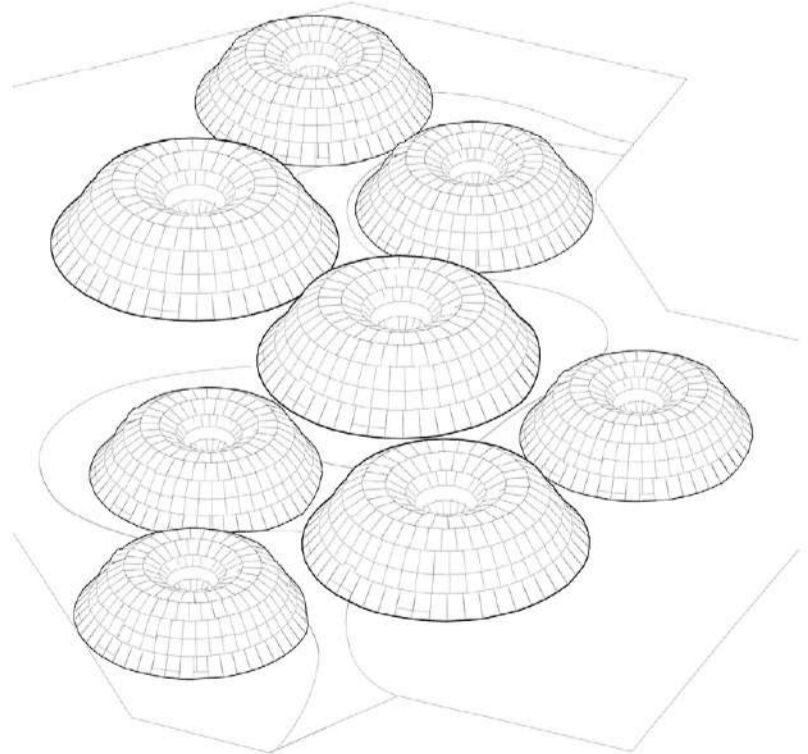

Holiday

During the holiday, a stable shelter is open for organizing a cultural function.

Hurricane

During hurricanes, a stable shelter awaits all those affected by the elements. The panels of the first level are closed and form a secure contour.
