

main drain

main collecting pipe

rainwater tank

Rainwater Harvesting & Storage (in Supports)

- Collection Area 140.25 m²
- Annual Collection 202,000 Liters
- Storage 101,000 Liters

Structural Design

- Hexagon 1.9 Meter Side Length.
- Materials Aluminum, Reinforced Concrete

Power Generation System

- Solar Panel Area 54 m².
- Output 65,700 kWh per year.
- Consumption 56,000 kWh.
