

### Hydroponic System

Type: Deep Water Culture (DWC) with a vertical design.

- Growing Pots: Convex pots integrated into the support legs.
- Nutrition: Water from the "legs" ensures efficient nutrient delivery.
- Plants: Leafy greens and herbs requiring minimal resources.

### Multifunctional Community Space

- Shaded Rest Area: The canopy creates a cool and comfortable space for relaxation and socialization.
- Community Garden: The hydroponic system provides an opportunity for collaborative food cultivation.
- Places for Quiet Reflection: The installation creates a peaceful atmosphere for rest and meditation.
- Social Interaction: The space is designed to encourage community interaction, events, and mutual learning.
