

# Ocean's Embrace

"Ocean's Embrace" is a living system integrated into the landscape and nspired by Fiji's nature.The dome canopy, resembling a turtle's shell, combines technology and respect for the environment

The hexagonal pattern creates a play of light and shadow while providing energy and water A sturdy metal structure ensures safety. The dome features solar panels and glass panels. Five supports collect rainwater, which is then filtered.

Solar energy powers the filtration system. The installation is a community hub, a symbol of sustainability, innovation, and harmony.
