

Marou Solar Coconut

Outside view

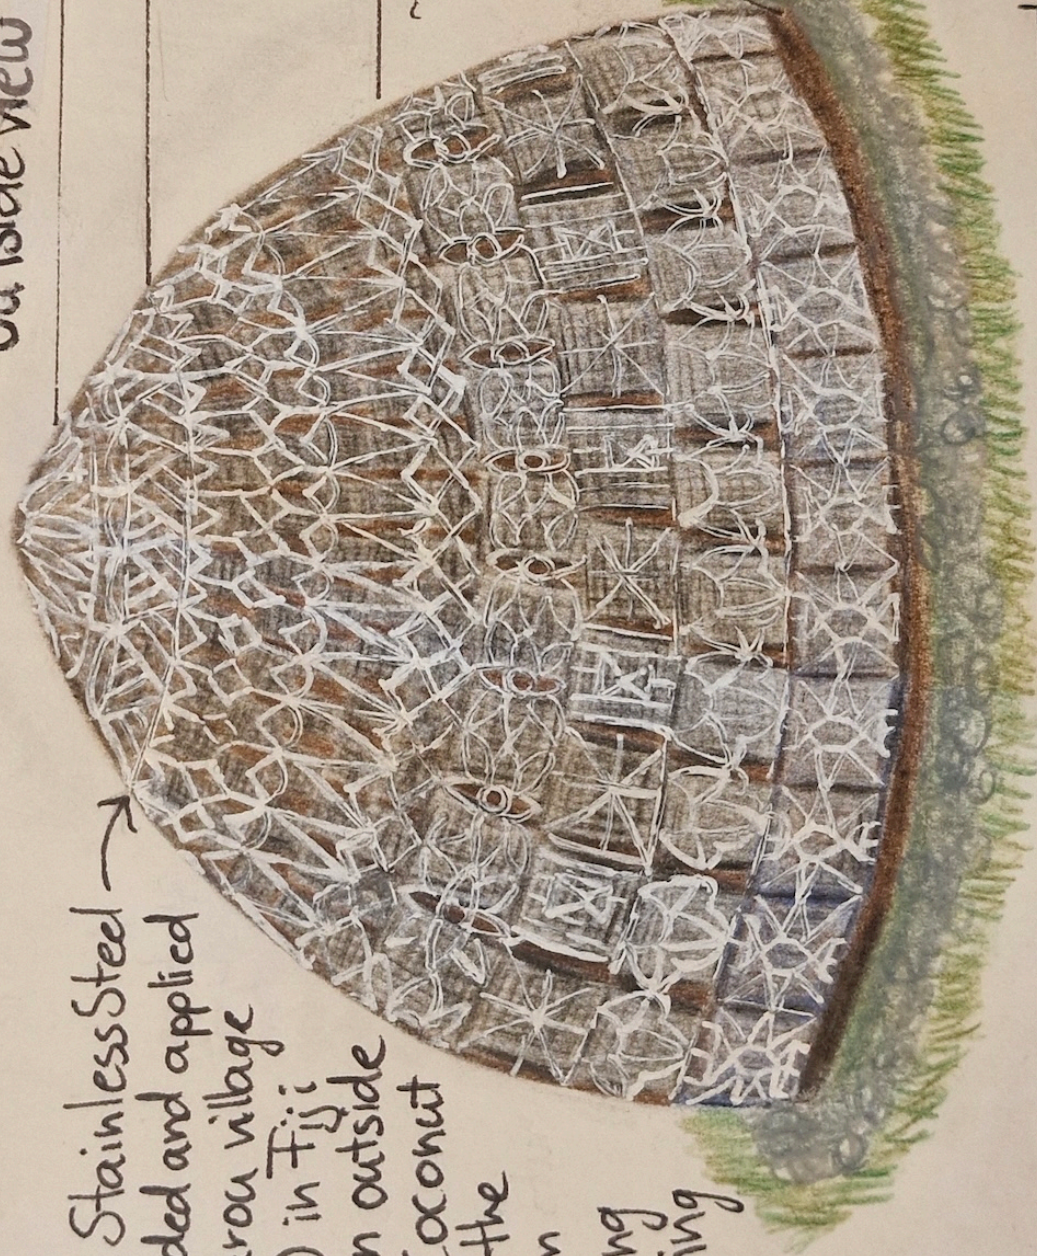

2 mm thick Stainless Steel
Wire is bended and applied
(ideally by Marou village
inhabitants) in Fijian
style pattern outside
the Solar Coconut
to protect the
panels from
objects flying
around during
cyclones

- ~ 10x10 cm static panels
- ~ 25x25 cm bendable panels
5 rows
- ~ 50x50 cm bendable panels
5 rows

- ~ 100x100 cm
- first row static panels
- other 3 rows bendable panels

coconut style
→ brown ground color
that is water proof

→ gravel stones
for drainage
and for preventing
the grass covering the
solar panels
