

Splicing — Waves

Concept

Waves

Splicing

Sustainable Goals

Social Role
Area for people to socialize and chat.
Space: A small activity area that provides a shelter for relaxation and communication

Power Generation
The device uses photovoltaic panels to generate electricity, and its power generation capacity can basically meet the demand and communication

Planting
There is a local planting tradition and the installation can grow local crops

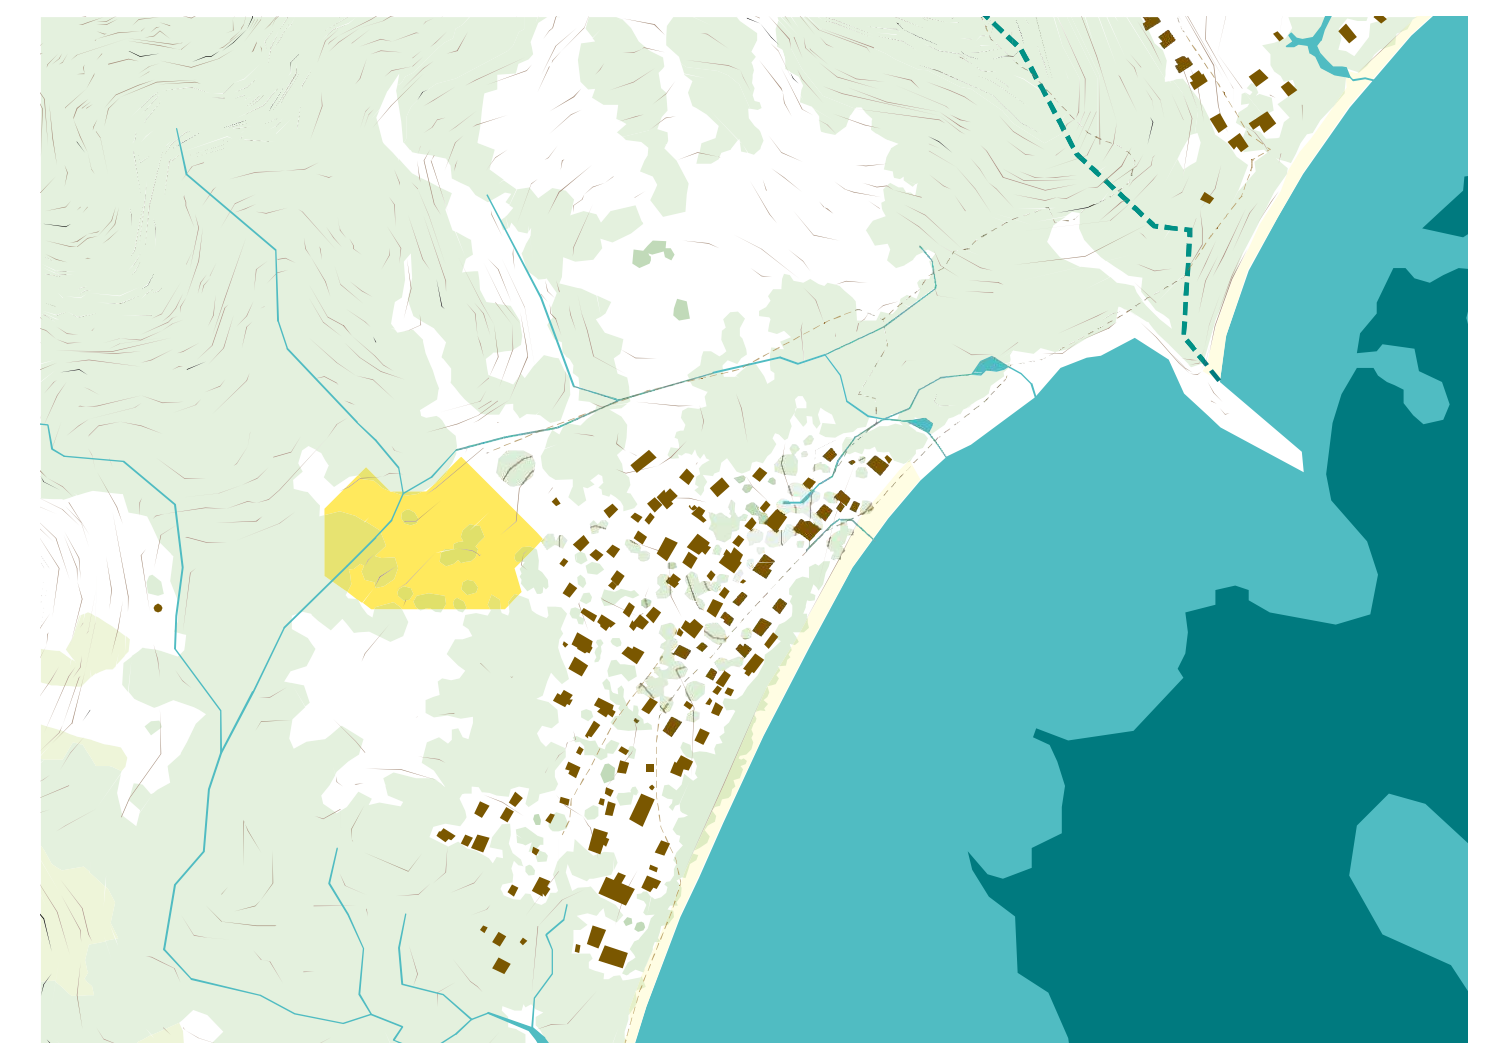

Rainwater Collection
The local water resources are scarce, and a device to collect rainwater is needed.

Cultural Symbols
It symbolizes the local island environment and becomes a local landmark.
