

JellyFiji

Due to the fact that the islands are surrounded by the Pacific Ocean and seas filled with marine life, we decided to pay special attention to this. They make a great contribution to the lives of the islanders, helping them move around, supply food, and engage in crafts. Therefore, our team would like the pavilion to also make a significant contribution to the development of village life and bring only positive emotions and benefits.

That's how we came up with the idea to create a pavilion based on one of the marine inhabitants, a jellyfish. It captivated us with its streamlined shape, the difference in colors and the abundance of species. Therefore, we decided to create 3 types of modules that are somewhat similar to each other, but at the same time differ in nuances, functions, and color, just like the jellyfish themselves.
