

The Heart of Social Life
This module serves as the main event and recreation space:
Traditions – Kava ceremonies, festivals and gatherings can be held here.
Tourism – Guides tell visitors about the history of the islands in the shade of the dome.
Sun protection – Cool under the “tentacle” canopies to escape the heat.

Creativity and Tea Party
This module is an atmosphere of craftsmanship and coziness:
Craft workshops – Learn how to weave, pottery or carve wood.
Tea House – Low tables with local herbs and fruits.
Flexible layout – The seat cushions can be easily rearranged for different events.

Vertical Garden
A compact module for green experiments:
Native plants – Growing taro, ginger or orchids.
Exotics – Testing new varieties in a controlled environment.
Education - demonstrating to

Each jellyfish acts as a support for solar panels, which reduces the amount of land used and increases the amount of energy generated. All jellyfish have night lighting of a certain color, depending on the size of the module. To maintain the image of the jellyfish and also to create a magical atmosphere. In addition, at least two nets for collecting water depart from each jellyfish.
