

TANOA: THE BOWL OF LIFE

GATHERING SUNLIGHT, RAINWATER, AND COMMUNITY

THE LAND ART GENERATOR INITIATIVE 2025

CONCEPT

Inspired by the sacred Fijian tanoa – a symbol of unity, dialogue, and shared resources – this living structure respectfully reimagines tradition. ‘The Bowl of Life’ is a multifunctional landmark that gathers sun, rain, and people. Elevated and circular in form, it generates clean energy, harvests rainwater, and offers 528 m² of shaded communal space. Built primarily from treated bamboo, it echoes cultural heritage while addressing modern challenges; supporting energy independence, water access, and resilient village life.
