

Structure which contains 1500 liters of water with algae.

10 meters of height.

Cleaning air, equivalent to 9,423 people breathing per day.

The photosynthesis process is carried out through micro algae.

Particulate capture of pm2.5 and pm10.0 99.7%

CO<sub>2</sub>

Containment capacity of CO<sub>2</sub>, CO and NOx 39,420,000 m<sup>3</sup>/per year
