

*(Alphabet for a new future)*

*Infinity is a symbol for the passage of time, embodying the eternal motion and the gradual variation of the atmosphere in relation to the course of the days and the seasons.*

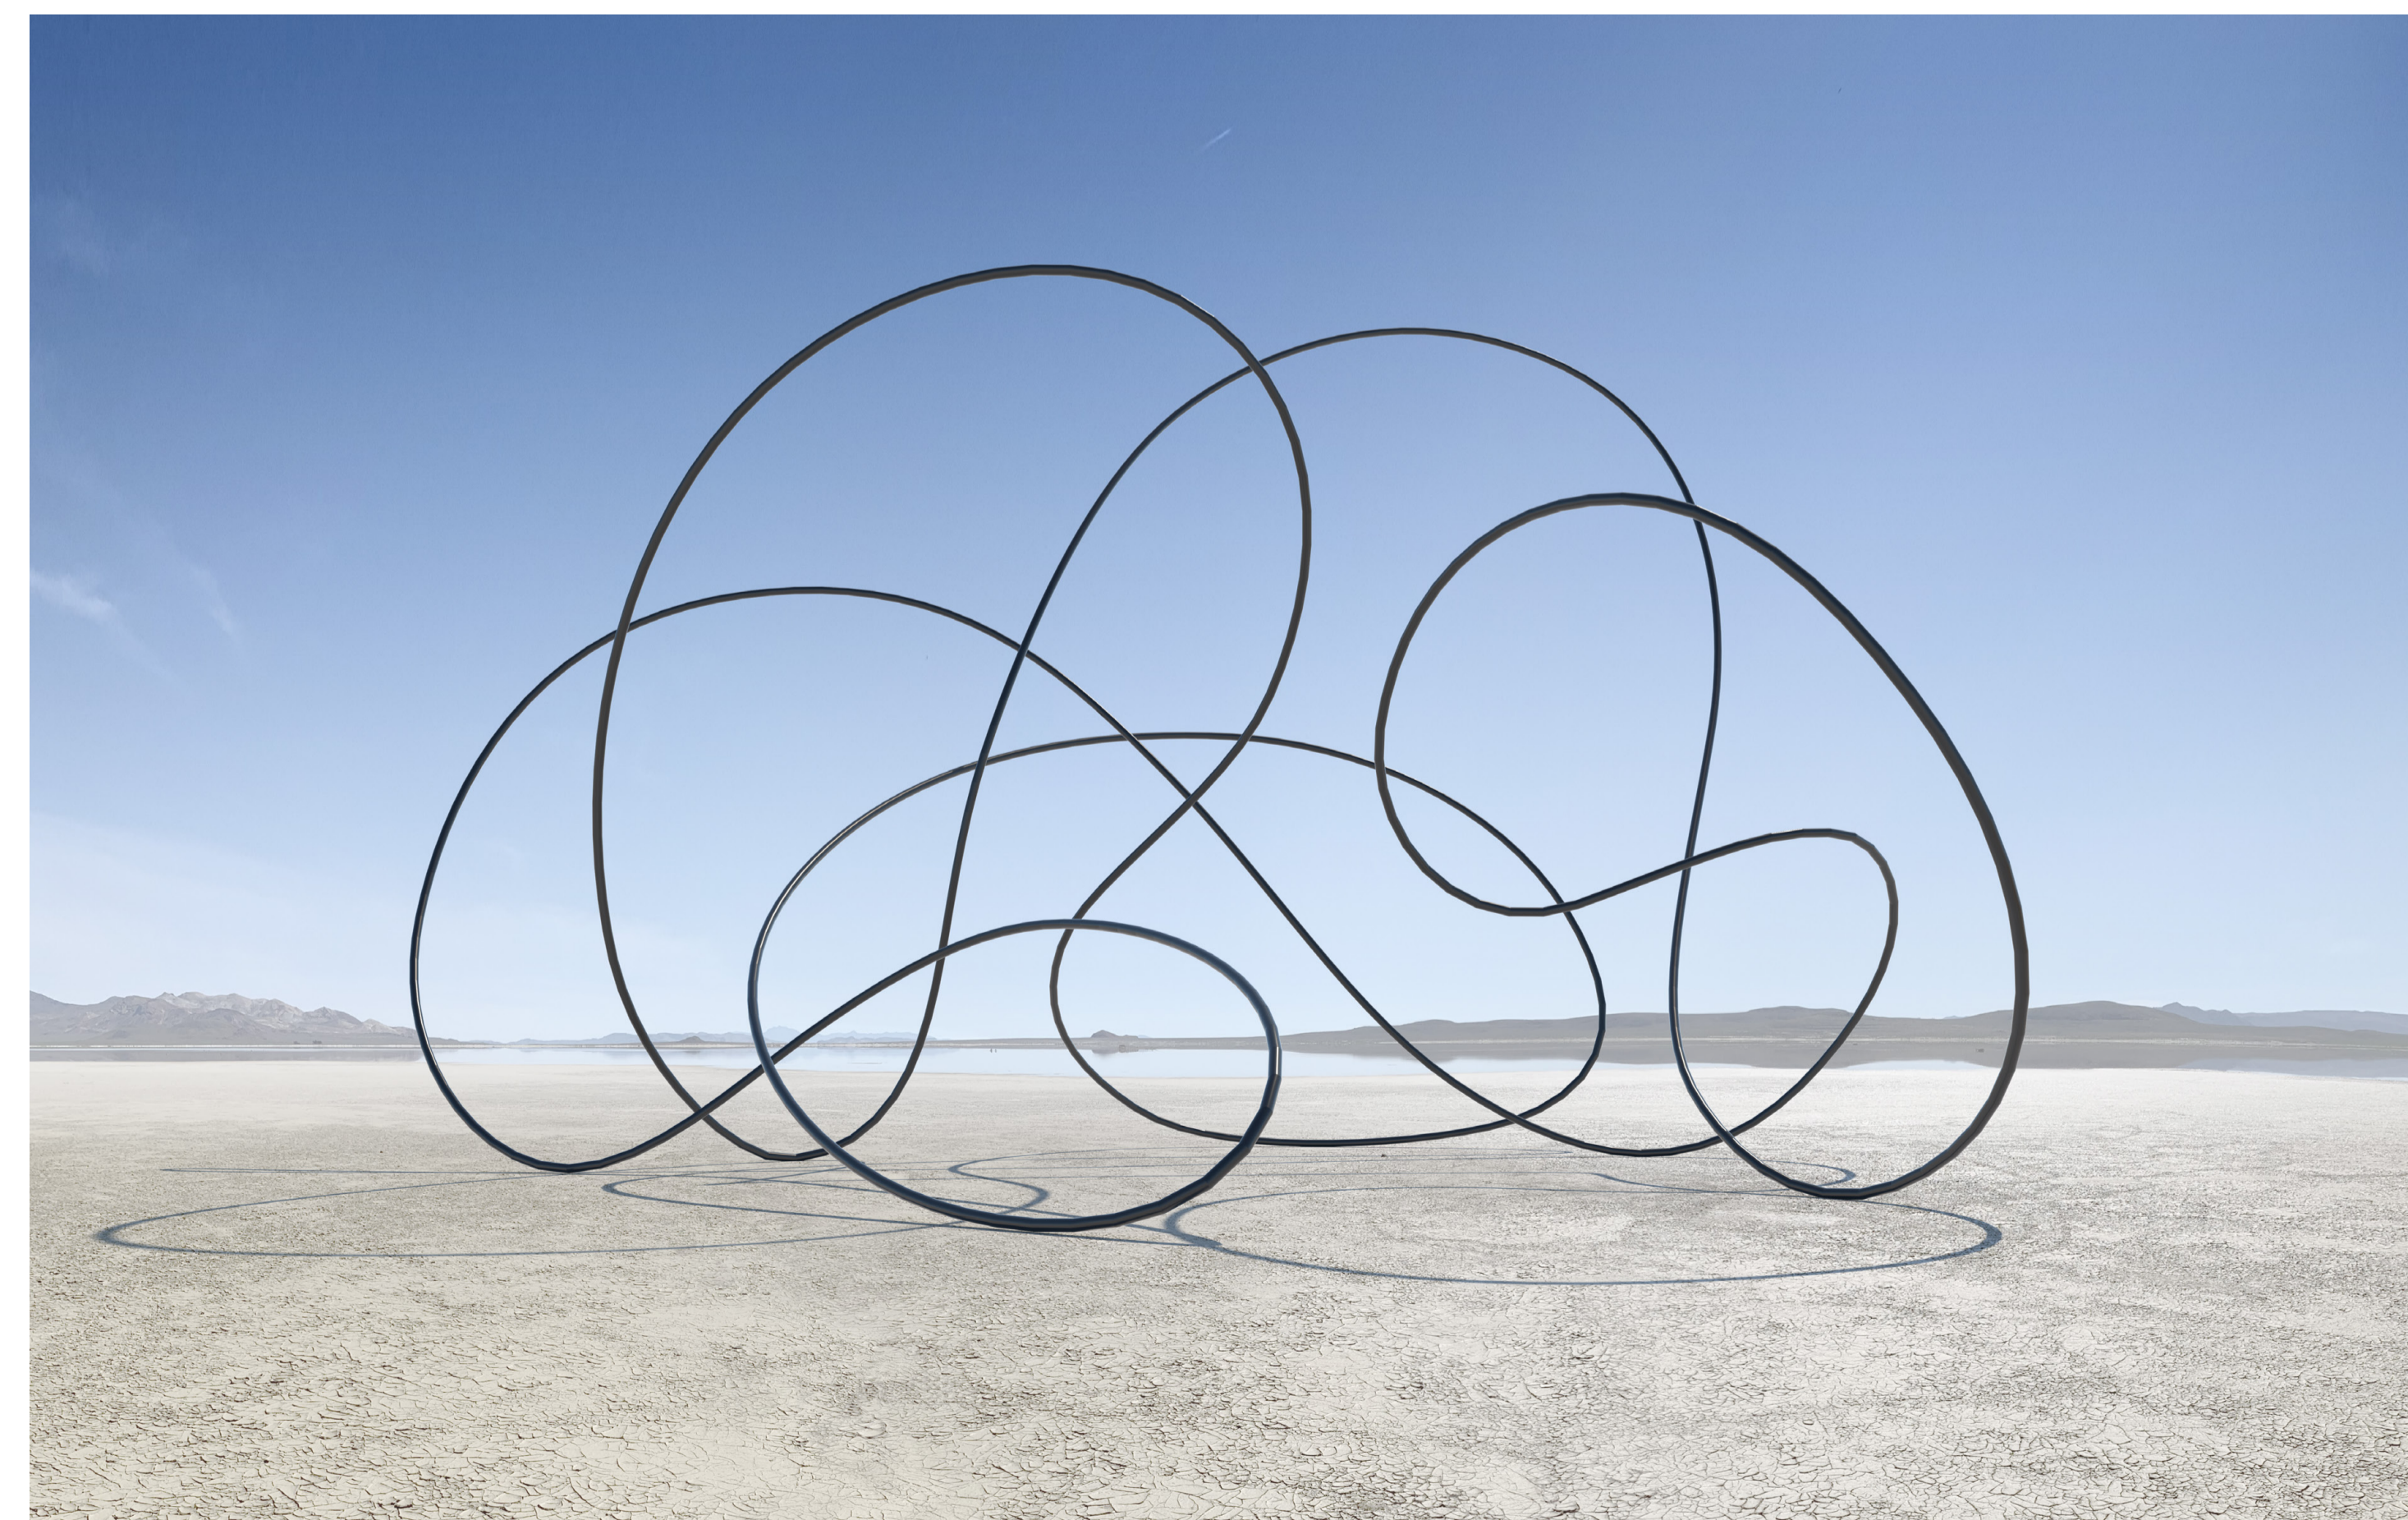

*Carapace is a dome that represents a turtle, symbol of perseverance and protection. It epitomizes self-reliance, tenacity, slow but steady progress, good health and long life.*

*Drawings* is inspired by the culture of Native Americans. The single elements offer an artistic interpretation of the symbols representing natural phenomena, human life and animals. They stand in the form of a new alphabet for a translation of one of the most ancient – and most suggestive – cultural heritages of humanity into the language of our technological and sustainable present.

*Rain Clouds symbolize – as for the Natives – good prospects for the future. Constantly changing, they give water which is essential for life, thus representing fertility and renewal.*

*Mother stand for the never-ending cycles of nature and human life, being a symbol of evolution, growth and regeneration.*
