

The project presents a corpus of artworks shaping three-dimensional drawings in the space. The installations are composed of cylindrical photovoltaic modules. During the day each independent structure absorbs and stores solar energy. During the night each of them becomes a source of illumination in the landscape.

Spider symbolizes creativity, power, growth and mystery.

Sun/Moon

Lightnings represent power and speed.

Wings represents the gradual movement of the wings of an eagle in the air. The eagle symbolizes the divine spirit, creation and freedom.

Transition
