

Stand-alone Power Station

240V Level 2 EV charging
120V
USB

10 solar panels – 4kW
Up to 18kWh a day
50kWh storage

A Tesla Model 3 requires approximately 34 kWh to travel to the nearest Supercharger.

**Level 2 charger: 3.5 - 9 hours
Regular 120V outlet: 17 - 26 hours**

A Level 2 electric vehicle charger relieves range anxiety for EV drivers and makes day trips and overnight trips by EV much easier.
