

WHEEL OF NATURE

The circular form of this project is taken from life cycle that explains energy comes from nature and return to it .

In this system is used PVT technology .

This design not only is used for creating energy but it also is considered as an artwork and is seen as an element in the flying ranch project in which via PVT technology maximum usage of solar panels is achieved.

In the design of this artwork and energy tower pipes have structural values and add to the stability of the solar panels which create electricity as well as heating the water depots.

PEACE FOOTPRINT

This design can be used in different variety of social and gathering facilities such as art galleries , performance institutes , restaurant , cafés and etc .

The technology used on the shell of this project is Crystalline silicon .

In order to construct lower crust level 3d printing technology is used with the usage of low carbon concrete as the main material .
