- semi-developed
- accessible to transit
- centrally located
- gently sloped
- social events
- artistic exploration
- agriculture
- community
- essential facilities
- non-winter lodging

## SOUTH FLY

- historic value
- undeveloped
- at-risk elevation
- preservation

# middle fly

## community and recreation grounds

94.9 megawatts (zone 1 only) and 260,000 liters of rainwater annually

Collectors array across a field to provide a framework of power, water, and shelter. The open-source pavilions can be outfitted to support recreational activities and essential functions.
