Power

Solar + Storage = Resilient Power

Why 91? 91 solar modules provide a rated capacity of 33 kW and will produce 57 MWh per year. Optional Wind Turbines and/or gasifiers can increase available power.

Energy Storage

The 100kWh battery can store energy from any source and can provide sustainable power day and night.

EV Charging

The power system can charge cars, trucks, scooters, bikes and golf carts completely carbon free.

Shelter

Sustainable Hot Tub

Rainwater is filtered and heated with renewable energy.

This version is called Larry's Lounge.
