

### Wikiup Dome

It is the real heart of the exhibition, where an artist's metal sculpture reproduces an "eternal" puppet of the Burning Man: a simulacrum in memory of of 2020 edition.

Under the darkness of the "wikiup dome", perforated by a pattern of holes representing the constellations of the sky at the solstice of June 21, as in the first Burning Man, every night the energy collected during the day by the "wikiup energy pyramid" is transformed into a show of artificial lights, flames and sounds.
