

above the ground

like sticks nailed to the soil
scouting for local answers
in the territory

Creating life by recognizing and
activating the enviromental stimuli

 Temperature rises
up to +40°C and
below -18°C

 Winds are hard,
specially during
the afternoon
and night

 Water shows us
the way

 You tolds us, we
could be anywhere
in these areas

 Great views!

 Green nails show
our network
