

# SOLAR GARDEN

## MY PLANT STORY

My plant story begins with the color and unique look of glass art. My plan is to have two main focal points using a wisteria arbore with look out on top. Cherry blossom tree over a pond utilizing the solar panels in a new and beautiful way to enhance the amazing views and transport you to a new world that you won't want to leave. Using glass to bring elegance angle that plays well with the soft and delicate live plants the create a butterfly garden with a beehive hidden away from the guests that allows the bees to pollinate the garden and also make honey.

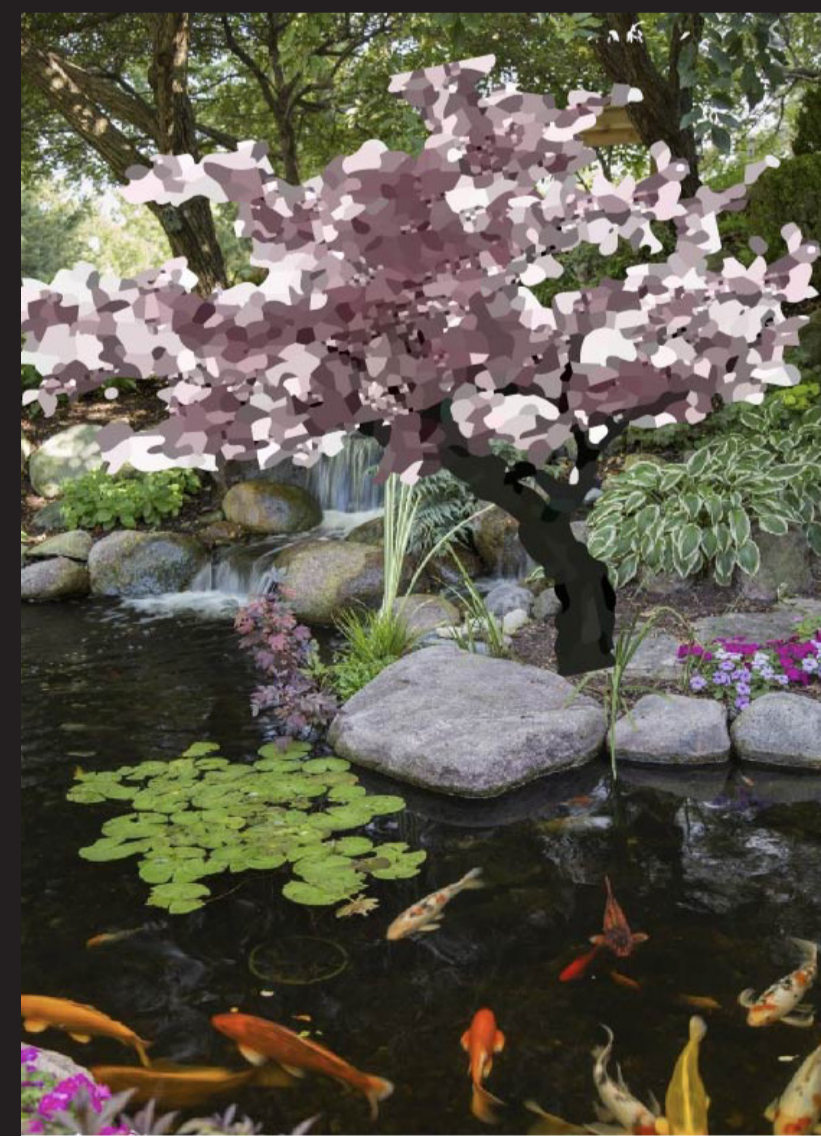

## FOCUAL POINTS

I BELIEVE FUNCTION IS KEY A SOLAR ARRAY THAT LOOKS BEAUTIFUL AND COLLECTS POWER AND ALSO ALLOWS GUESTS TO USE IT A AN OBSERVATION DECK TO SEE THE HOLE GARDEN AS A WHOLE FROM ABOVE. AND PUTTING LIGHTS IN IT WILL MAKE IT A HOLE THIRD DIMINATION THAT BRINGS A FANTASY ELEMENT TO THE GARDEN. USING THE STRUCTURE TO ALSO HELP COLLECT WATER TO THE POND

## FOCUAL POINTS

THE MAGICAL CHERRY BLOSSOM TREE USING THE GLASS TO REFLECT THE THE LIGHT AROUND THE GARDEN. WHILE USING THE SUN USES THIS TO CATCH THE EXCESS RAIN IN TO THE POND THAT IS AT THE BASE OF THE TREE. THE POND WILL HAVE KOI IN IT TO HELP CREAT FURLTIZED WATER THAT WILL BE USED TO WATER THE PLANTS THREW THE YEAR. THE POND WILL BE FILLED BY RIN AND SNOW AND IF NEEDED IT WILL UTILISE THE WELL SPRING THAT ARE ON THE PROPERITY. THE TREE WILL HELP TO PROVENT EVAPERATIONBY SHADING THE POND.
