

PERPETUAL MOTION

TO WHAT EXTENT CAN WE MAKE USE OFOUR PLANET?

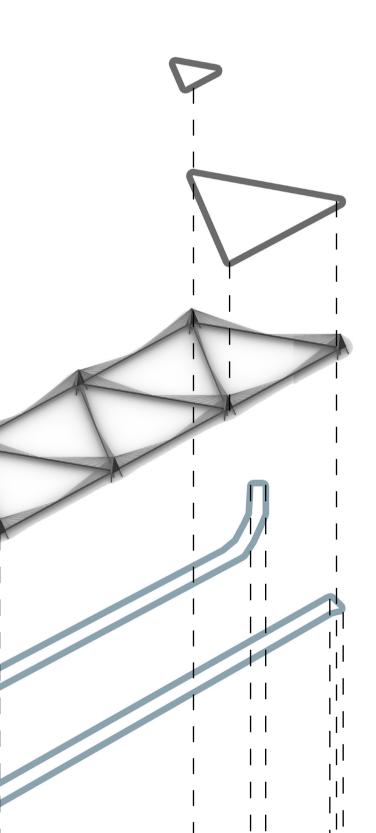

The pyramid shapes on the plains may appear as vague spirits of National Americans' wigwams, or the settlers' field fire places, or the industrial oil pumps. How shall we use abundant natural resources?

Savage herbs have gradually turned into grocery. Is sustainable farming a new way of collaborating with nature?

Humans have always tried to explore the vast lands of pure wilderness and settle within the nature. Steadily, humans try to dominate and make use of the nature. What should be the rules of co-existence?

PERPETUAL MOTION

NON-INVASIVE LAND ART OF AUTONOMOUS PLANT WATERING

The most stable shape of a regular triangle is the base of the irrigating modules and the hovering distribution system

The non-invasive autonomous irrigation system for the organic farm may be expanded further

Two parallel water ditches with possible filters sypply the compact irrigation system

A possible location for the future organic farm is the southern edge of the Middle Reservoir
