

THE WAVE

The Wave is a 3140 m2 project that seeks to provide ecological solutions to multiple current problems, taking advantage of and blending in with its surroundings and providing infinite possibilities.

The genesis of the project is born in uniting the dominant characteristics of the area where it is located such as: Mountains, Lakes and Geysers.

Generating a sustainable project that provides solar energy, water and shelter as well as leisure and recreation spaces for the inhabitants of the area and for tourists.

Mountains + Lake + Geysers
=
Shelter + Water + Energy
