

OF SPACE CREATION AND ENGAGEMENT WITH THE CIRCLE OF LIFE

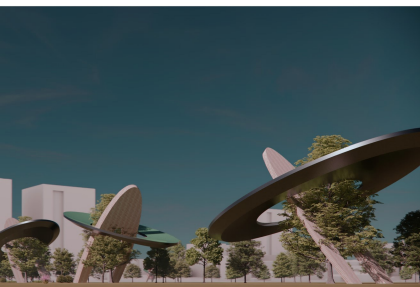

the structure of the circle of life, we can create layouts and spaces according to the needs of the environment. For example, for more power supply or a natural environment, etc

type, as shown in the picture, prepares an area in a manner to build activities and functional places in the environment. For example, a restaurant, conference environment, sports environment, etc

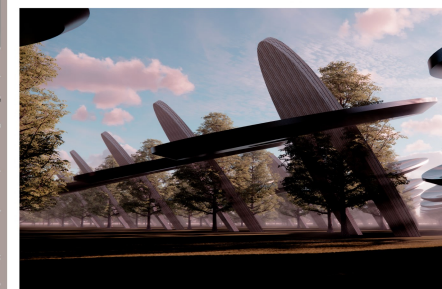

and type, as shown in the picture, has been widely used in this structure so that a greater amount of solar energy can be used. The way the structure of the circle of life is designed makes plants and trees grow with the growth of electricity production

type, as shown in the picture, is placed randomly in different directions to be used to guide the movement of people. By using the third type of circulation, a natural environment is given

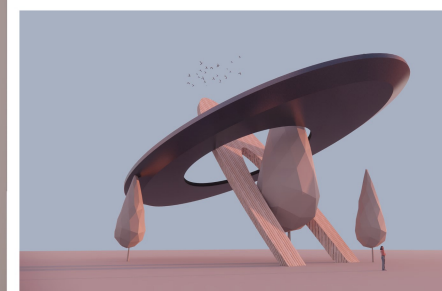

The first type

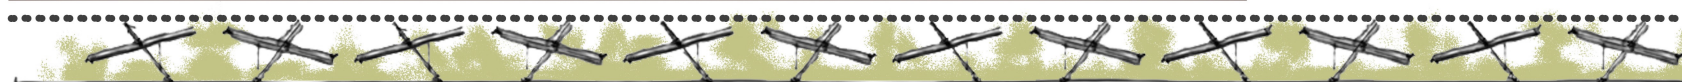

The second type

The third type

Simple image to better see the form and shape of the circle of life

The height of the circle of life structure is not higher than the height of the trees and it conveys the concept of equality and respect for nature so that both the solar panels and the trees use the sunlight
