

H.E.A.R.T.

.Holistic Engine for Adaptive and Restorative Transformation.

what we TAKE

THE LOVE OF THE LIFE BRINGERS

From the center of the park, we take up the inspiring example of Dominic Spinelli. His love for people and his generosity are the starting point to resume his initiative to keep the local people alive. To strengthen the community.

This "Holistic Engine for Adaptive and Restorative Transformation" (H.E.A.R.T.) recalls the Neckar River, and its ancient channels, as the one that gave life to this part of Europe and part of its current form to the city.

Spinelli's heart is also Mannheim's heart. We propose a space to celebrate love for our planet. A square that functions as a heart.

In this way, H.E.A.R.T. uses water, to reconnect people in the section of the Völklinger axis that intersects with the train tracks that start from the current U Hall and the projection of the street axis that reaches the churches of St. Hildegard and Philippuskirche.
