

Puppy Gallery

Raise the sloping solar panel by 2 meters, and the back of the solar panel becomes the perfect display panel for displaying children's paintings. The Organizing Committee can organize a global children's painting competition with the theme of "Achieving the United Nations Sustainable Development Goals", and print the winning works on the back of the solar panels. 20 puppy-shaped solar panels form a colourful gallery along the bike path. When visitors appreciate the paintings, they can also feel the urgency of realizing the UN Sustainable Development Goals and caring for our shared earth.
