

Solar Cabana

Every design has hidden details taht one has to look carefully to see and appreciate.

The lights are automatic, using light sensors.

The bench seats are foldable - down to be used as seats and up to make space for other activities.

The Cabana is 16 square meters, with a maximum height of 4 meters.

The shadows the grid creates makes pattern on the concrete slab, using sunlight.

The grid would be swapped out, with different writings and patterns, depending on the current events.

This chosen pattern creates a calm atmosphere.
