

ENVIRONMENTAL AND SOCIAL FACTORS

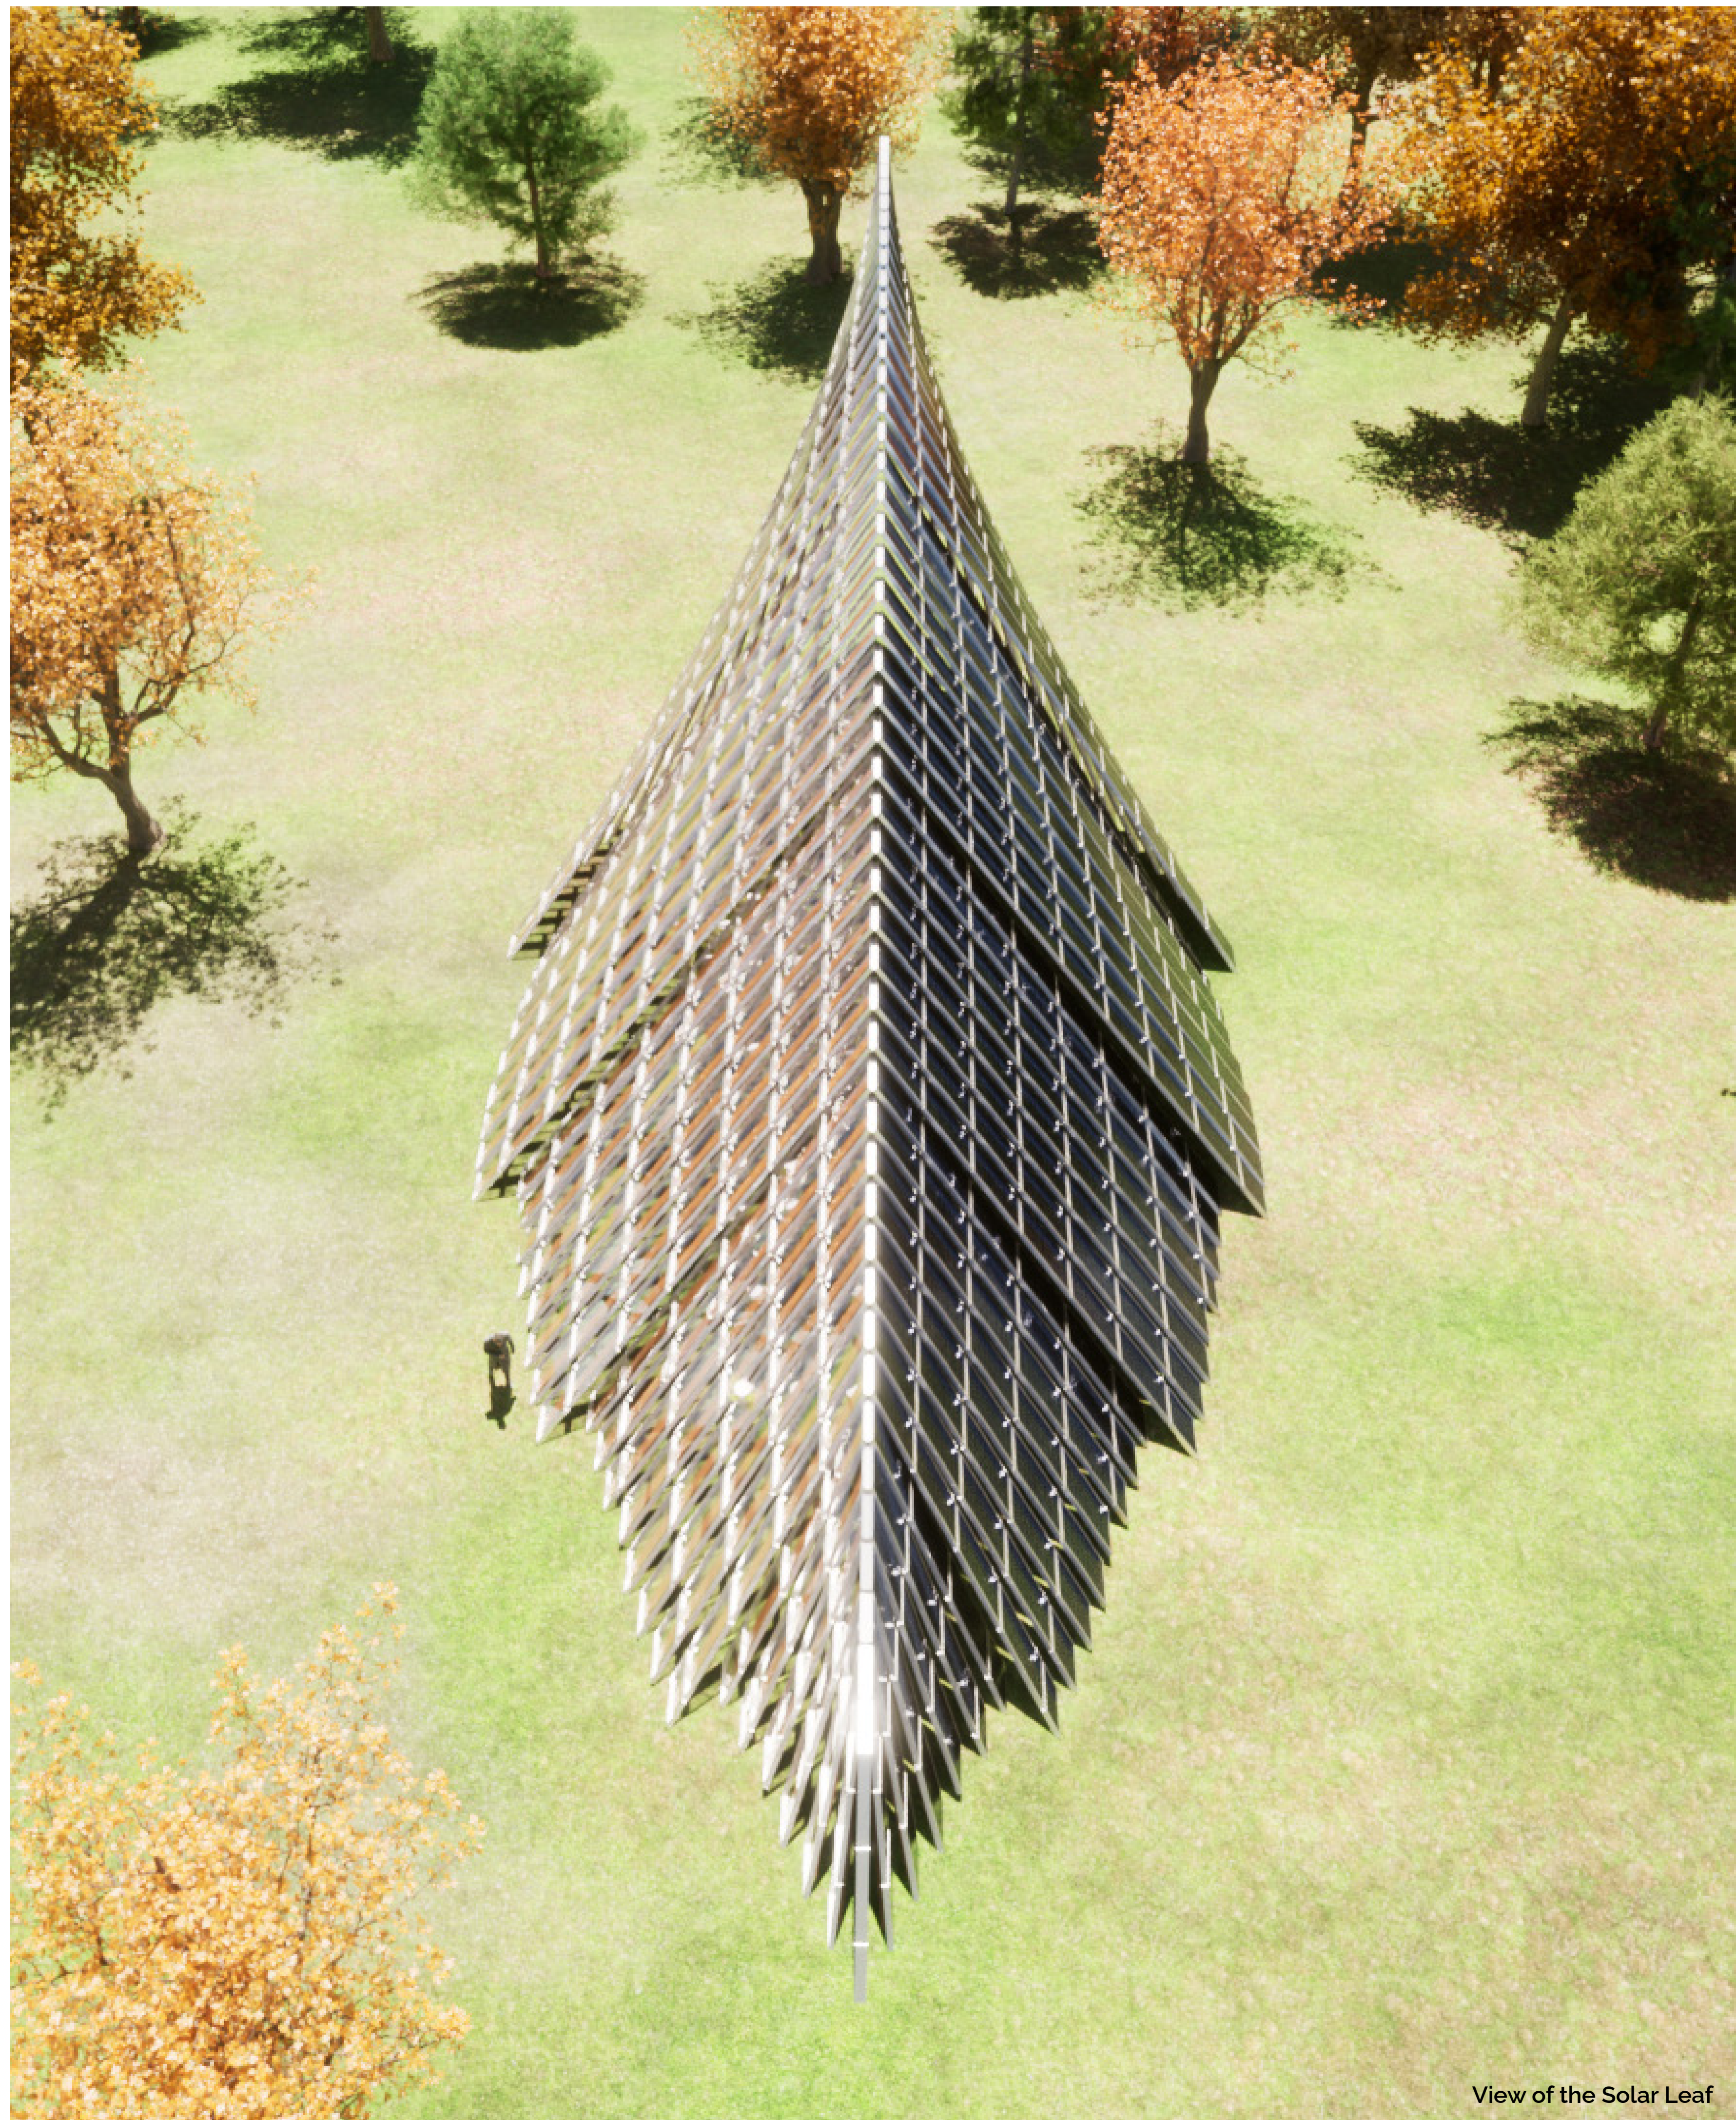

Based on principles of sustainable technology and inspired by systems in nature, the "Solar Leaf" creates a unique backdrop and "place" for interaction connecting nature, art & technology towards a unique collaboration respecting the earth's resources.

MODULARITY AND SCALABILITY

The "Solar Leaf" could potentially serve as a hybrid system addressing global issues such as food security and clean energy across various scales. It could perform in a cluster or as a singular entity meant for a backyard.
