

Modular Kinetic Energy Withering Flower

LIGHTING

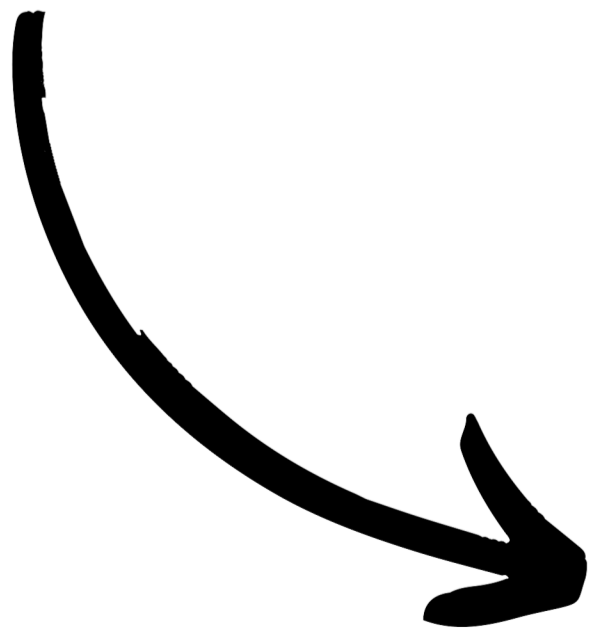

CLOSE UP VIEW OF THE LED LIGHTS ON THE DIAMOND/SQUARE PATTERNS ON EACH LEAF.

EACH LEAF HAS 1 NEON COLOURED LIGHT ON EACH HOLLOW SQUARE

AS THE LEAVES MOVE DURING THE DAY, THE NEON LIGHTS GENERATE POWER FROM THE SUN TO LIGHT UP THROUGH OUT THE NIGHT

DAY/NIGHT STRIP LED LIGHTS (WATER RESISTANT) AND POWERED BY THE SELF GENERATED POWER FROM THE WITHERING MOTION.

6 COLOUR LED/NEON LIGHTS ON INTERNAL SQUARES

THE LIGHTING INCREASES COMPLIMENTARY AESTHETICS TO THE PARK MORE AT NIGHT, AS DIFFERENT COLORS ARE EMITTED THROUGH EACH MOVEMENT OF THE LEAVES. SUPPLIES GENERAL LIGHT TO THE ENTIRE PARK, ALMOST EVERYWHERE WHERE EACH FLOWER IS PLACED.
