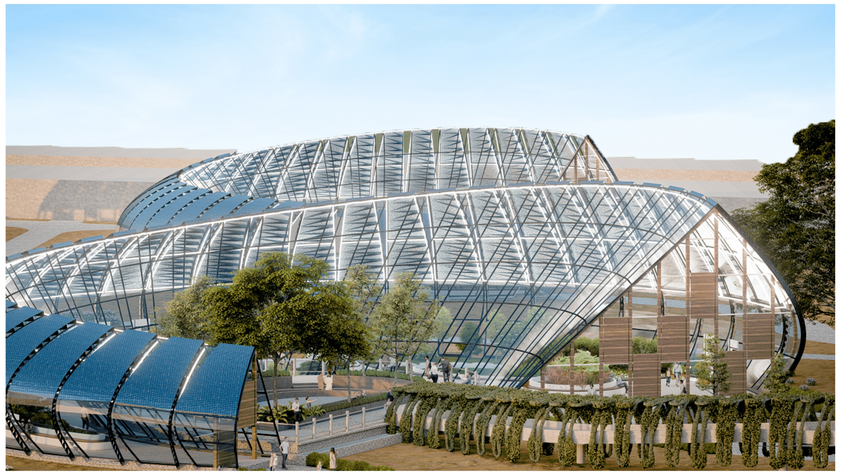
VORFREUDE

Anticipation for New Discovery!



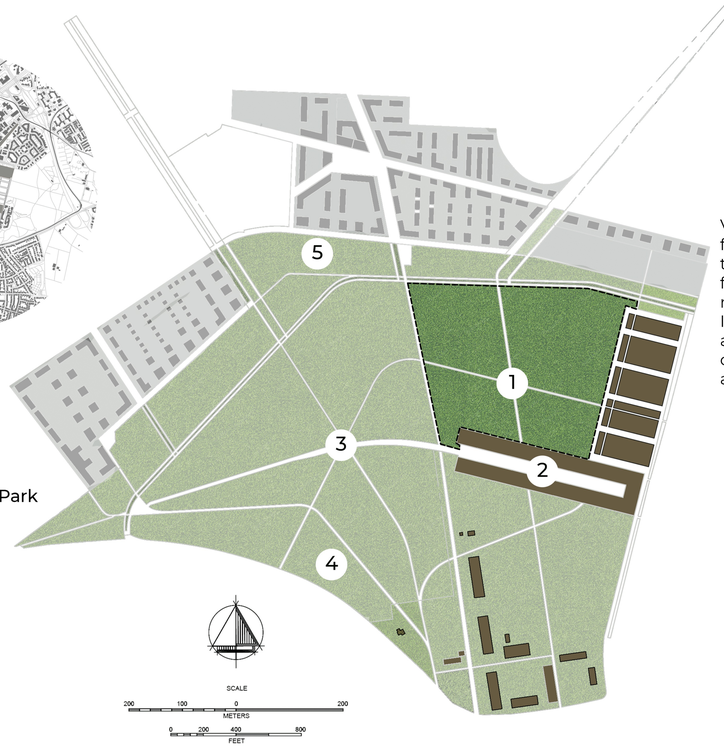
Vorfreude is a Garden Pavilion and Observation Tower located in the Themed Garden Spinelli Park area, Mannheim, Germany. This facility consists of an observation area, and an educational area related to plant care, agricultural technology development and ecological awareness. This design is made for a long time with a shape that adapts to the Spinelli park flower garden area without affecting the Spinelli park flower garden ecosystem.

The name **"Vorfreude"** is taken from German which means **"waiting for the pleasures to come: it is enjoying the dreams and hopes that we have"**. We hope this design can give visitors a fun and enthusiastic feeling to learn and explore the Spinelli park flower garden site further. We hope that Visitors can enjoy the beauty of the Spinelli park and increase visitor awareness of the importance of maintaining and caring for the Spinelli park flower garden ecosystem in the future.

Energy-independency for Sustainble Future

Preserving the Ecology and nature component which live within

Seeking for pleasure and excitement within the discovery of nature



1. Themed garden
2. U Hall
3. Climate Park
4. Neodine
5. Play and Activity Park

The Site Area is located in Spinelli Park, Mennheim, Germany. The site area is planned as a themed garden for BUGA, it will contain vegetation in the form of flower gardens, and food source gardens. The site area is 101,000m2, it is about around 170m from UHall. It's located near the Secondary Entrance and accesible from the main entrance.

Site area are used to be Spinelli Baracks. This area is planned to be an outdoor space that contribute to BUGA in the areas of climate, renewable energies, nature and the environment, and food security.

Learn more about ecology

Vorfreude is a facility that made to support Educational and recreational purposes, these facilities are concist of Garden Pavilion and Observation Tower. Observation activities from the observation tower can provide further understanding of the plants in the Spinelli Park flower garden. Visitors can enjoy the beauty of the Spinelli Park flower garden to the maximum from the top of the tower. In the center there are 4 pavilions with different themes. In this pavilion, visitors will be presented with garden landscapes and vegetation exhibitions as well as learn more about plant care, types of plants and flowers, and innovations in developing vegetation for food. Visitors can also get involved by trying to apply technology and experience firsthand the ways to care for plants.
