

Piezoelectric generator- placed under the red paths , makes the vibrations and pressure caused by biking and pedestrians can be converted into electricity

Vertical -Axis vind turbines-used to generate electricity from wind energy.

Vertical axis wind turbine (VWAT) -Qr7 UNITY

Bicycle expressway

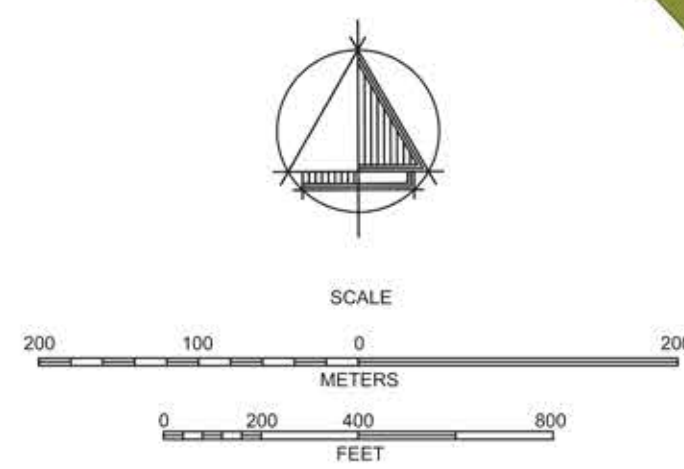

Pedestrian Axis

Flexible phototvoltaic -thin film solar cell

Site Boundary
1:100

interpretation of the park zone , in ground paths , created to connect e dges of the main interscion between the red disks
