

reEcoTopia

Modular and scalable system of harvesting water, solar energy and wind energy including gardening, sustainability, education and meet space.

Water

Collecting water direct and indirect, waterstorage, usage for gardening and drinking

Solar

Collecting solar energy, energystorage, direct usage for charging ebikes, mobilephones and lights

Gardening

Plant flowers, trees and vegetables, community garden

Wind

Using space for harvesting wind energy, including the Grünzug-system

Playground and Education

Experiencing energy production for all ages, learning direct what is energy and what it means to create energy

Social gathering

Places for coming together and make social gathering
